ADDRESS BY ALEKSEY V. GORDEEV

ALEKSEY V. GORDEEV
Chairman of the Supervisory Board

Year 2006 wrote a new remarkable page in the history of the agribusiness sector of Russia. The development of the sector was supported not only by a steady macroeconomic growth, but also by an increased care for the sector from the Federal and local governmental authorities. There has been a significant increase in the capital investment in the development of agricultural production. The process of upgrading and technical renovation of the sector is proceeding at accelerated pace. The introduction of highly efficient and resourcesaving technologies is among the outstanding achievements of this year. The pace of social background rebuilding in the rural areas of Russia had also accelerated. The cumulative effect of these trends resulted in a qualitative step forward to the development of highly efficient and competitive domestic agribusiness sector in Russia in 2006.

National credit and financial system plays a dominant role in the implementation of important national objectives in agribusiness sector. It is well known that financial capital has always been and still remains one of the main leverages of economic growth. Nowadays one should not underestimate its significance in the context

of the initial stage of the market relations in our country. The majority of agricultural producers, as well as food-processing enterprises draw up their economical strategy in close interrelation with the business environment of the banking services market. Funds availability and their cost determine to a large extent the industrial activity in the real sector of the economy.

It is rewarding that Russian Agricultural Bank plays the leading role in agribusiness lending. And the Bank strengthens its position year by year. Executing the functions of the Russian Government's financial agent, the Bank delivers comprehensible, qualitative and efficient satisfaction of agribusiness needs in banking products. It is quite logical that the high growth rates of RAB development, steady increase of customer base, boosting of the branches network expansion and dedicated efforts to upgrade the quality of client service had allowed Russian Agricultural Bank to join top 10 largest Russian banks. Year 2006 also saw increased international ratings of the Bank. The Bank has developed a worldwide network of correspondent relations and is recognized as a trusted partner of leading world banks and financial institutions.

It is vital that Russian Agricultural Bank as the only agricultural State owned bank in the country is expected to play a significant role in the implementation of the new Federal Law "On agricultural development" that was signed by the President of the Russian Federation on the 29th December 2006. The Law lays down the objectives, principles, areas of activity and execution measures of the State agricultural policy. A considerable part of the Law is dedicated to the Federal support of the agricultural development and in particular to the financing of the particular activities from the Federal budget.

Besides, in accordance with new national banking legal rules, Russian financial institutions are empowered to widen the number of sources available for increasing their capital. This will allow Russian Agricultural Bank as well to employ financial instruments used by banks world-wide.

In 2007 Russian Agricultural Bank faces major tasks and challenges. The strategic objectives of the Bank

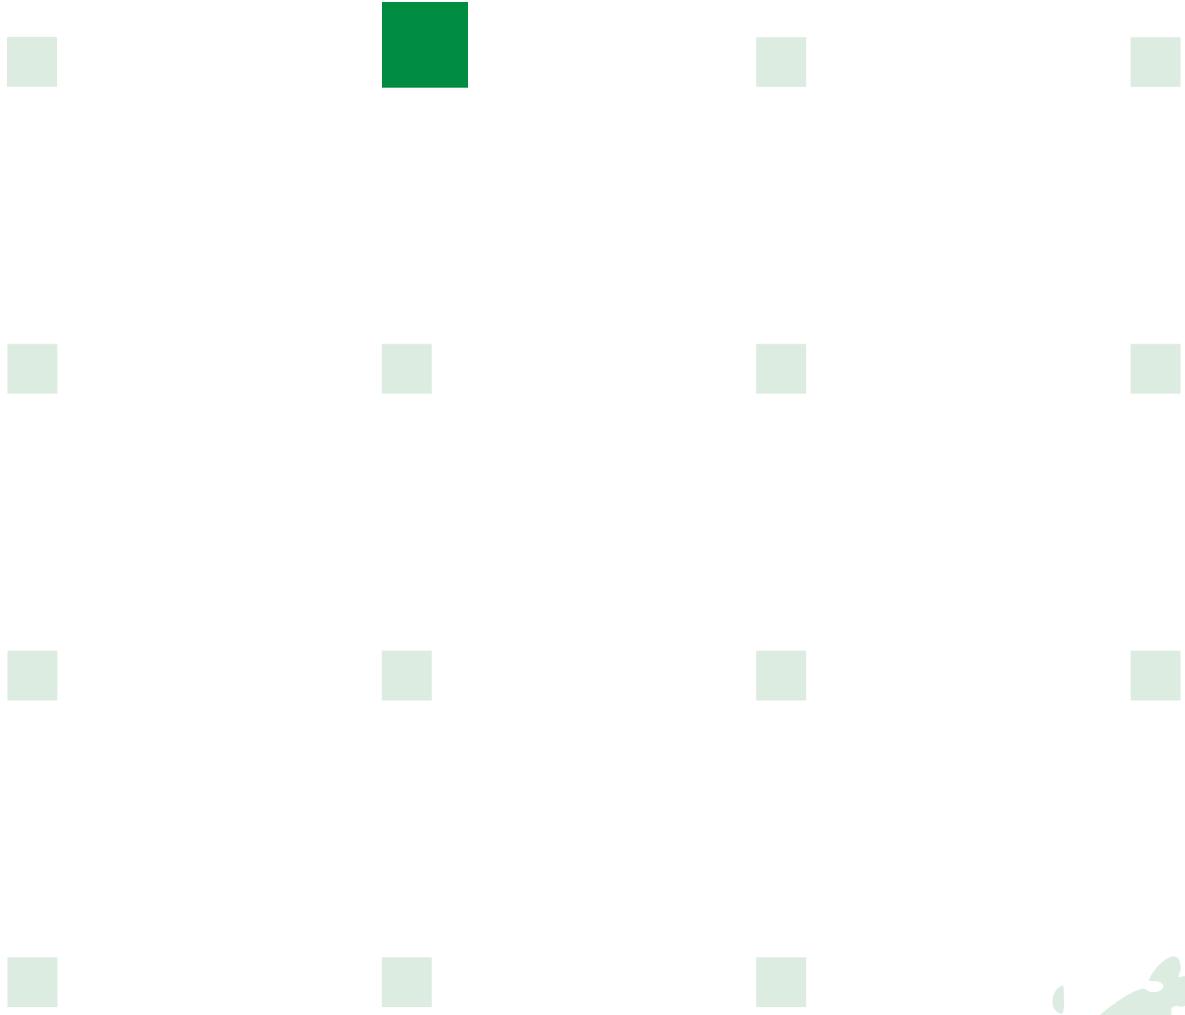

are directly related to the targets set by the Government: to facilitate development of agribusiness in Russia, to provide leverage to agricultural and food industries and to implement the National Priority Project on Agribusiness Development.

As the Bank enters its seventh year of operations, it is determined to take up these challenges and to focus on sustainable growth and diversification of its loan portfolio. I believe that high international ratings, positive credit history and sound positioning on the international financial market will allow Russian Agricultural Bank to enjoy a high level of investors' confidence and to significantly enhance its financial strength.

It is a large-scale, crucial and at the same time honorable task. I believe that it is quite within the powers of the Bank's Team that by its achievements has already confirmed its business goodwill and professionalism.

MESSAGE FROM YURI V. TRUSHIN

YURI V. TRUSHIN

Chairman of the Executive Board and CEO

Russian Agricultural Bank is one of the country's younger financial institutions, but its commercial success combined with the support of the Government ensured its leading position in the special niche of agribusiness lending in the financial services market, as well as a path for fast controlled growth.

In 2006 the team of RAB has been purposefully and consistently working to attain the targets of operations expansion and growth of lending to the country's agribusiness sector. The Bank has significantly strengthened its position in the domestic market of banking services. The implementation of the National Priority Project on Agribusiness Development and expansion of range of services for rural population were among key priorities of the Bank's activity. According to expert estimates, the market share in agribusiness lending of Russian Agricultural Bank, as a specialized institution and agricultural mainstay, has significantly increased in the year under review. Thus, RAB has reached the level that allows it to take up one of the leading positions in the area of agribusiness lending.

One of the Bank's priority areas and areas of special focus for the team is the task of increasing its capitalization. In 2006 the Bank of Russia registered the ninth issue of the shares of Russian Agricultural Bank. After

the increase of about 40% the share capital reached RUR 20,9 bln. and own capital – RUR 32,4 bln. Efficient financial tools used by the Bank in the domestic and international financial markets contributed to a broad funding program which equipped the Bank with funds that allowed its balance sheet to grow.

According to expert estimates, RAB belongs to the category of the most dynamic Russian financial institutions, it joined the group of the country's leading banks in terms of such indicators as capital gains, size of assets, extended loans volume, reliability as a service provider. Thus, a certain step forward has been made to strengthen the Bank's position as a modern competitive financial institution.

Dynamic development of Russian Agricultural Bank, its strictly regulated lending policy aimed at full satisfaction of agribusiness needs allowed it to increase 3,5 times the loan portfolio in 2006. At the same time the volumes of long-term investment lending have increased significantly. Today RAB assigns more than one third of credit resources for investment purposes. Further increase in agricultural production, technical and technological rebuilding of the sector are largely determined by the credit support and RAB plans to expand significantly the scale of loans in the long term.

Incremental funding of the Bank allowed it to achieve successfully the objectives within the National Priority Project on Agribusiness Development, exceeding to a large extent all expectations.

In 2006 RAB focused on the accelerated development of farm animal breeding programs, small and medium-sized farms, mortgage housing for young agricultural specialists and the creation of a land mortgage program that allowed agricultural producers to borrow against their land as collateral and to finance their farm operations. Most of these loans were dedicated to financing the purchase of new machinery and farm equipment. The loan program for small farmers has been a resounding success – mostly because of the wide RAB branch network and in part because the Government reimbursed borrowers the interest paid on their loans. These agricultural tailor-made banking products allowed RAB to open an enormous new cluster of business in the banking sector.

Development of retail was a special focus of the Bank's activity in 2006. This activity, on one hand, contributed to improvement of social background, ensuring employment and living standards of rural population, and, on the other hand, has diversified RAB liabilities and increased the share of individual deposits in Bank's funding. RAB retail product is of high importance for all the territories of Russia and we are committed to deliver quality and up-to-date banking services to the population in rural areas.

Major efforts have been undertaken in 2006 to expand the Bank's branch network. In total 5 regional branches and 446 additional offices were opened. As a result, the number of points of RAB network, where clients can use the services of the Bank, has reached 1000. A further build-up of the branch network will provide for even more extensive territorial coverage. By the end of 2007 the number of branches will grow to 1400

– expanding the presence of RAB to practically every agricultural region and ensuring a broad coverage of unsatisfied market demand for financial services in the sector.

Upgrades of RAB credit ratings by leading international rating agencies, including «Moody's Investors Services» and «Fitch Ratings» are a significant achievement in the international area. Current credit ratings reconfirm RAB as a financial institution of international standing and reflect its high level of credit quality and investment appeal. The Bank's overall performance has caught the eye of international investors, who have eagerly participated in RAB's ruble and foreign currency bond issues. Besides, RAB has a worldwide correspondent relations network, including 70 foreign banks, which is expected to grow further and open new avenues for cooperation and implementation of the Bank's strategy and mission.

The growth achievements of the Bank and its credit history provide a solid foundation for future sustained growth of lending to agricultural producers and the achievement of a greater efficiency of the Bank's operations. RAB will continue to expand its range of banking products, to grow and improve the quality of credit portfolio, to leverage risk management, to diversify funding and to maintain the highest standards of business transparency. In 2007 RAB expects a further increase of the share capital. As stipulated in the strategic plan, RAB has an ambitious goal to maintain a strong financial profile and become one of the leading financial institutions within the top five Russian banks. There is a good prospect of accelerating growth in agribusiness sector and social background reconstruction of the rural areas of Russia through the development of lending and financial markets in the sector. Russian Agricultural Bank has the confidence and ability to be a key part of this process.

CORE ACTIVITY

CORE ACTIVITY

Russian Agricultural Bank was set up in 2000 under the special Decree of the President of the Russian Federation with the mission to be the conductor of the State credit and financial policy in agribusiness sector, to facilitate a strong performance by clients, to invest in the core businesses and technology and to be the basis of the national credit and financial system of agribusiness in the Russian Federation.

Development framework of Russian Agricultural Bank is to operate both as a commercial bank providing banking services to companies and individuals operating in the agricultural industry and as an agent of the Russian Government participating in State programs of support of the agricultural industry.

In 2006 RAB continued to strengthen its positions on the banking market, contributing to the development of the economic and social potential of the agribusiness sector.

The core activities of RAB in 2006 were:

- Implementation of the National Priority Project on Agribusiness Development;
- Capitalization growth;
- Asset growth;
- Credit support of borrowers' sowing and harvest campaigns;
- Investments in the expansion of the agribusiness production, its technical and technological modernization, including provision of loans for the purchases of agricultural machinery, equipment and pedigree animals under their pledge, and also building and reconstruction of livestock farms;
- Lending and financial support of social and economic development of rural areas based on the program Sel'skoe podvorie;
- Support of financial restructuring of the agricultural enterprises;
- Recovery of loans extended in 1992 – 2000 from the Russian federal budget and extra-budgetary sources to legal entities engaged in the agricultural industry;
- Further expansion of the regional branches network.

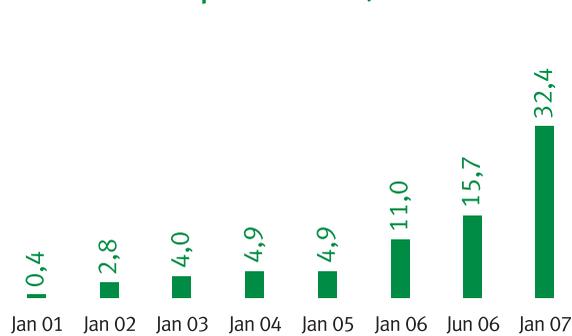

RAB acts as the State agent for:

- Recovering loans extended in 1992 – 2000 from the Russian federal budget and extra-budgetary sources to legal entities engaged in the agricultural industry. In 2006 RAB has recovered RUR 905,6 bln. The first part of the funds recovered – RUR 208 bln. – was already added to the Bank's share capital;
- Realization of the Federal Law On Financial Rehabilitation of Agricultural Enterprises;
- Financing of grain purchase and commodity interventions (part of the price stabilization program of the State). In 2006 RAB extended loans to the total amount of RUR 1,2 bln.

The Government's support of the RAB's business growth is evidenced by 9 share capital increases since 2000. The latest capital increase of RUR 5,9 billion took place in December 2006. Further capital injections are expected in connection with the National Priority Project on Agribusiness Development.

RAB's Own Capital Growth, RUR bln.

According to the analytical and expert agencies, Russian Agricultural Bank is one of the most dynamic financial institutions in Russia, and one of the leading

financial institutions in terms of the size of own capital, assets, and loan portfolio growth.

First-Rated Banks in Russia in 2006*

In 2006 RAB actively participated in the implementation of the social and economic programs for revival and development of native agriculture, and in the technological, organizational and methodological preparation of the main lines of the National Priority Project on Agribusiness Development.

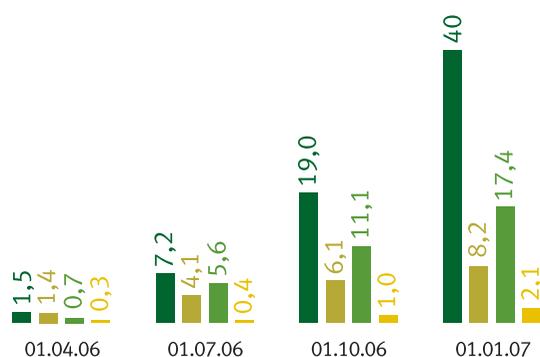

RAB is one of the leading financial institutions participating in the National Priority Project on Agribusiness Development, initiated and supervised by President of Russia Vladimir V. Putin. The National Project envisages State support of the agricultural industry through the development of agricultural credit and consumer cooperatives, support of the livestock industry, development of lending secured by agricultural land mortgages and certain other measures.

Before 2006, RAB elaborated the required regulatory procedures, mobilized required funds, and launched the program of accelerated and massive development of the regional branches network.

In 2006 RAB dynamically granted loans in the framework of the National Priority Project on Agribusiness Development. On the average, regional branches granted about 3-4 thousands loans per week.

Within the framework of the National Priority Project, RAB has granted ca. 130 thousands loans for the total amount of RUR 70,5 bln., this is 45,1% of the total loan portfolio.

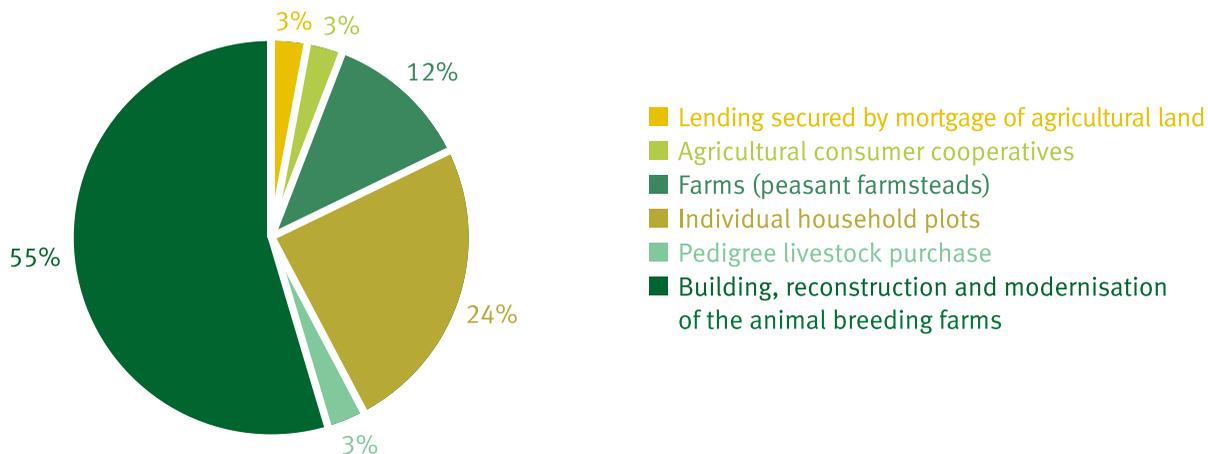

Dynamics of the Loans Extended in the Framework of the Priority National Project on Agribusiness Development, RUR bln.

- Animal breeding
- Farms (peasant farmsteads)
- Individual household plots
- Agricultural credit consumer cooperatives

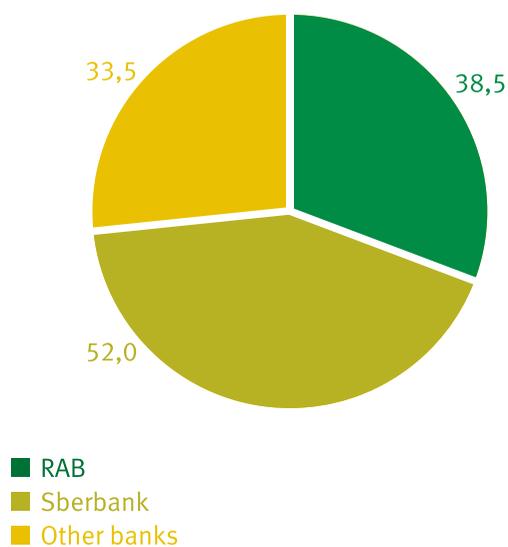

* Data of Russian Business Consulting-daily, as of 01.01.2007

Split of Loans Extended by RAB in the Framework of National Priority Project on Agribusiness Development

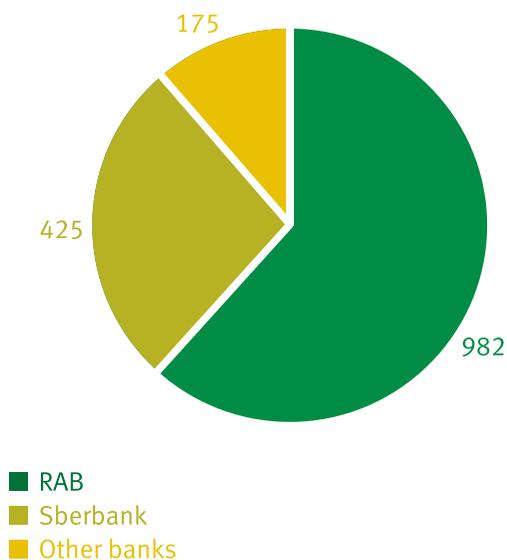

As of January 1st, 2007 RAB accounts for over 30% of total loans volume and accounts for 62,1%* of total number of loans provided by all Russian banks that participate in the National Priority Project in the program on Accelerated Development of Livestock Breeding.

Loans Extended, RUR bln.

Loans Extended by Number, RUR bln.

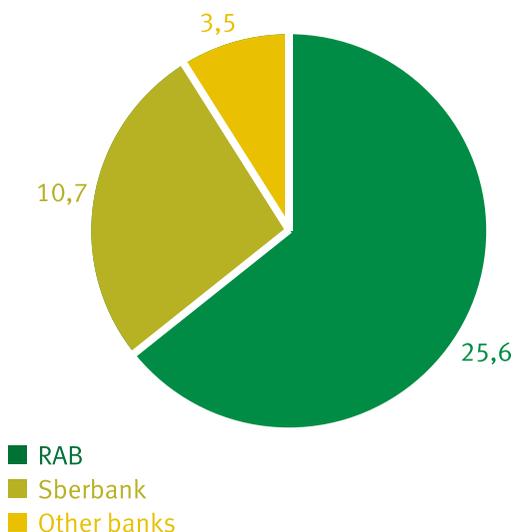

* Data of Ministry of Agriculture of the Russian Federation

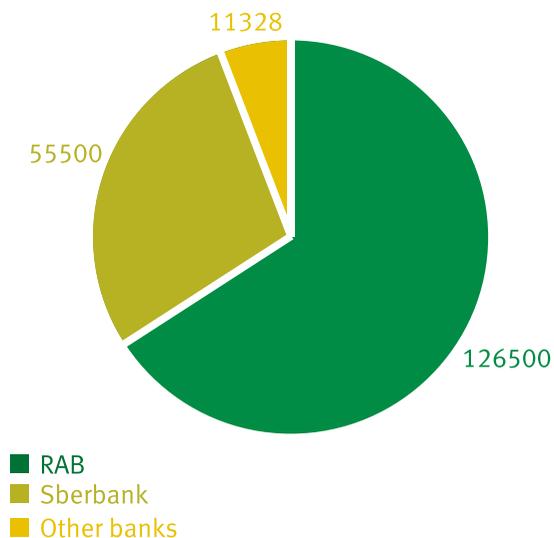

RAB holds dominant positions in lending to Small and Medium Enterprises («SME's») with the following market shares:

- Individual household plots — 72%;
- Farms (peasant farmsteads) — 57%;
- Agricultural consumer cooperatives — 67%;
- Agricultural credit consumer cooperatives — 90%*.

**Loans Amount Extended to SME's,
RUR bln.**

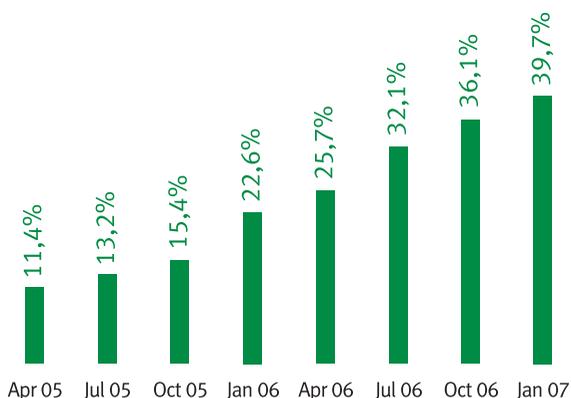

Loans Number Extended to SME's

RAB's market share in financing agribusiness is rapidly growing. According to the preliminary forecasts it will reach 50% in 2007.

Retail Sector

Retail service for rural population is a new business line for RAB, but it possesses a huge potential. RAB provides financial service to about 25% of population living in the rural areas of Russia.

As of 1st of January 2007 RAB extended over 162 thousand loans to the total amount of ca. RUR 22 bln. Monthly RAB extended RUR 1,8 bln. As of 1st of January 2006 the share of retail loans in the loan portfolio was below 1% and as of 1st of January 2007 it reached 13,3%.

Retail Loans Structure

Type of Loan	Number of Agreements (thousands)	Amount (RUR bln.)	Share in Retail Loan Portfolio (%)
Individual household plots	122,0	17,4	80,6
Mortgage loans	0,6	0,3	1,4
Consumer loans	40,0	3,9	18,0
Total	162,6	21,6	100,0

In the year under review RAB became one of the leading banks by retail service and is ranked 14 among other banks in Russia. With regard to deposit growth RAB is ranked number 2*.

Retail loans to individual household plots owners are covered by State support within the National Priority Project on Agribusiness Development. As of 1st of January 2007 RAB extended 122 thousand loans to the total amount of RUR 17,4 bln. targeted to finance:

- Livestock and poultry — 59 %;
- Building, reconstruction and refurbishment of farms buildings — 10%;
- Purchase of equipment and machinery — 15%;
- Mineral fertilizers — 10%;
- Other — 6 %.

Consumer and mortgage loans are highly demanded products in retail market. In 2006 RAB extended 39,4 thousand loans to the total amount of RUR 4,3 bln. Loans were granted for mini tractors or trucks purchase, building of farmsteads, reconstruction and refurbishment of real estate, livestock purchase, en-

gineering home improvement, houses gasification, purchase of household devices, etc.

In 2007 retail sector service development will be one of the key objectives impacting on overall growth of the Bank.

* Data of Russian Business Consulting News Agency

MISSION, STRATEGY AND OUTLOOK FOR 2007

MISSION, STRATEGY AND OUTLOOK FOR 2007

Mission of Russian Agricultural Bank

- Implement governmental finance and credit policy in the agribusiness and in rural areas in Russia;
- Facilitate domestic and foreign investment in the agribusiness sector of Russian economy.

Strategy and Outlook for 2007

Core Activity

- Maintain the leading position in lending to agribusiness;
- Finance procurement of modern agricultural machinery and equipment;
- Develop lending to individuals residing in small towns and rural areas;
- Develop land mortgage system in Russia.

Financial Profile

- Maintain a strong financial profile and competitive position;
- Diversify operations in various regions and agricultural sub-sectors;
- Develop and grow customer accounts/deposits and fee and commission income.

Corporate Development

- Implement modern banking and IT technologies to achieve efficiency growth and high quality service;
- Develop professionalism of the personnel and maintain unified high standards of performance across the whole branch network in order to ensure good banking practice standards of clients service.

Medium-term Goal

Become one of the leading financial institutions among Top 5 Russian banks through applying the best international practices and technology.

MARKET POSITIONING

MARKET POSITIONING

In 2006 the Russian economy maintained high growth rates, typical of the previous 3-year period.

RUSSIAN FEDERATION: SELECTED ECONOMIC INDICATORS 1999-2007 (forecast)*

Economic indicator	1999	2000	2001	2002	2003	2004	2005	2006	2007F

In 2006 there were positive changes in the expert evaluations of the Russian investment climate.

Thus, Fitch Ratings upgraded Russia's credit rating to «BBB+», Standard & Poor's also upgraded Russia's long-term foreign currency rating to «BBB+».

According to the data of the consulting company A.T. Kearney, Russia is rated 6 in terms of foreign direct investment appeal index, following China, India, United States, United Kingdom and Poland.

Besides, based on the results of the independent poll among foreign companies of various branches of econ-

omy on the issue of Russia's investment appeal conducted in 2006 by Advisory Council on Foreign Investment in Russia, Russia's image for potential investors has improved notably. Thus, 94% of investors present in the Russian market estimate their business as successful and plan to expand their activity in Russia in years to come (in 2005 — 78%, respectively). Two main advantages of investing in Russia were identified: capacity and depth of the Russian market and high growth rates of the Russian economy.

Russian agricultural industry stimulated by the governmental programs is progressing steadily. The import of foodstuffs and primary products is decreasing, while at the same time the import of agricultural machines and equipment is growing.

Data of «AgroFakt» agency:

- As of March 7, 2007, alongside with the obvious decrease in volumes of the imported agricultural goods the import of the agricultural equipment in Russia increased by 53% in 2006 on the whole and amounted to \$1 385 mln. (as compared to \$903 mln. in 2005). Machinery from Germany (33,6%), United States (15,5%) and Ukraine (7,7%) accounted for the major part in the structure of imports at year-end 2006.
- In 2006 2 618 combine harvesters were imported to Russia to the total amount of \$290,6 mln. (as compared to \$226,1 mln. in 2005), 6 234 tractors of agricultural use were imported to the total amount of \$241,1 mln. (compared to \$126,9 mln., respectively), imported agricultural adapters totaled \$280,2 mln. (compared to \$ 168,7 mln.), other imported equipment for the agricultural sector totaled \$473,1 mln. (compared to \$321,8 mln.) and imported spare parts totaled \$100,5 mln. (compared to \$59,2 mln.).

* Data of Ministry of Economic Development and Trade of the Russian Federation

Investments in the agribusiness sector are growing at a high rate and in 2006 the increase was 56% (as compared to 2005) and amounted to almost RUR 250 bln. Such growth is related to increased profitability of investments on the whole, implementation of the national projects, development of material and technical base.

Capital stock investments in the agricultural sector and food industry accounted for 1,4 points of the aggregate growth rate of investments into the economy (as compared to 0,6 points in 2005), largely on the account of purchase of machines and equipment.

Capital stock investment gains structure in the main sectors of the economy (in %) *

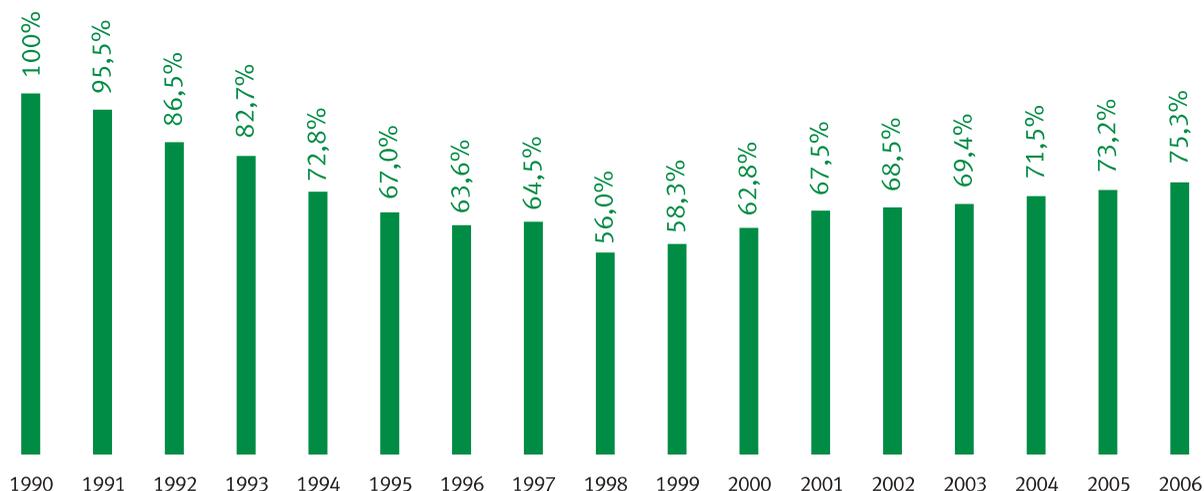

Capital stock investment gains	2004	2005	2006
All types of business activity in total	11,7	10,7	13,5
Extracting sector	0,7	0	3,8
Transport	2,4	4,6	2,8
Agricultural sector	0,3	0,6	1,4
Education, health care, public utilities and social services	0,7	0,9	1,0
Real estate	2,5	0,3	0,8
Construction	-0,9	0,3	0,6
Trade	0,3	0,8	0,5
Communications	1,1	0,9	0,5
Metal manufacture	1,2	0,6	0,3
Machine-building	0,2	-0,1	0,3
Energy sector	1,3	0,3	0,3
Others	1,7	1,4	1,0

* Data of Ministry of Economic Development and Trade of the Russian Federation

The main goal of Russian agro-industrial policy is growth and accelerated development of agricultural production based on competitive market principals and improve-

ment of living standards in rural areas. Due to the implementation of successful strategy the entire sector has consequently seen improved efficiency and productivity.

Gross Agricultural Output Index (in comparable prices, in % to 1990)*

In 1990-1998 decrease was 44% (in average 5,5% a year)

In 1999-2006 increase was 34,4% (in average 4,3% a year)

Note: main periods of gross agricultural output growth during last 50 years:

1952-1956 - 5 years	1976-1978 - 3 years
1958-1962 - 5 years	1999-2006 - 8 years

Russian Agricultural Bank is the key element in implementing the Government's initiative on providing subsidized loans to the sector. It has also given extensive advice on restructuring outstanding bad debts within the sector.

Starting from the beginning of 2007 Russian Agricultural Bank as the only agricultural state-owned bank, is expected to play a considerable role in implementing the new Federal Law «On agricultural development» that was signed by the President of the Russian Federation on the 29th December 2006. The Law provides for the Federal support of the agricultural development and allows financing of particular activities from the Federal budget. The Law provides for the reimbursement of 2/3 of the interest expenses of the borrower by the Federal budget and

1/3 — by regional budgets and fixes tenor of 5 years for particular agricultural loans.

Legislative reforms of 2006 are likely to contribute to the further improvement of the investment climate in Russia. In accordance with new national banking legislation (Federal Law of 29th December 2006 № 247-FZ «On the changes introduced to Articles 50.36 and 50.39 of the Federal Law «On Credit Institutions Insolvency (Bankruptcy)» and to Article 72 of the Federal Law «On the Central Bank of the Russian Federation (Bank of Russia)») Russian banks are empowered to widen the number of sources available for increasing their capital. This change involves subordinated debt capital instruments used by banks world-wide, i.e. so called Lower and Upper Tier II capital instruments, as well as innovative core capital instruments.

* Data of Ministry of Agriculture of the Russian Federation

Russian Agricultural Bank has a unique position in the Russian market because of its:

- Target clientele — small and medium size agro-industrial producers and processors;
- Country-wide branch network (matched only by that of Sberbank);
- Deep knowledge of agribusiness lending and expertise in financing in rural areas;
- Policy role as a basis of the national credit and financial system for agribusiness in the Russian Federation.

As a result, Russian Agricultural Bank occupies an agribusiness lending niche in the market, which makes it hard for other banks to compete with it directly:

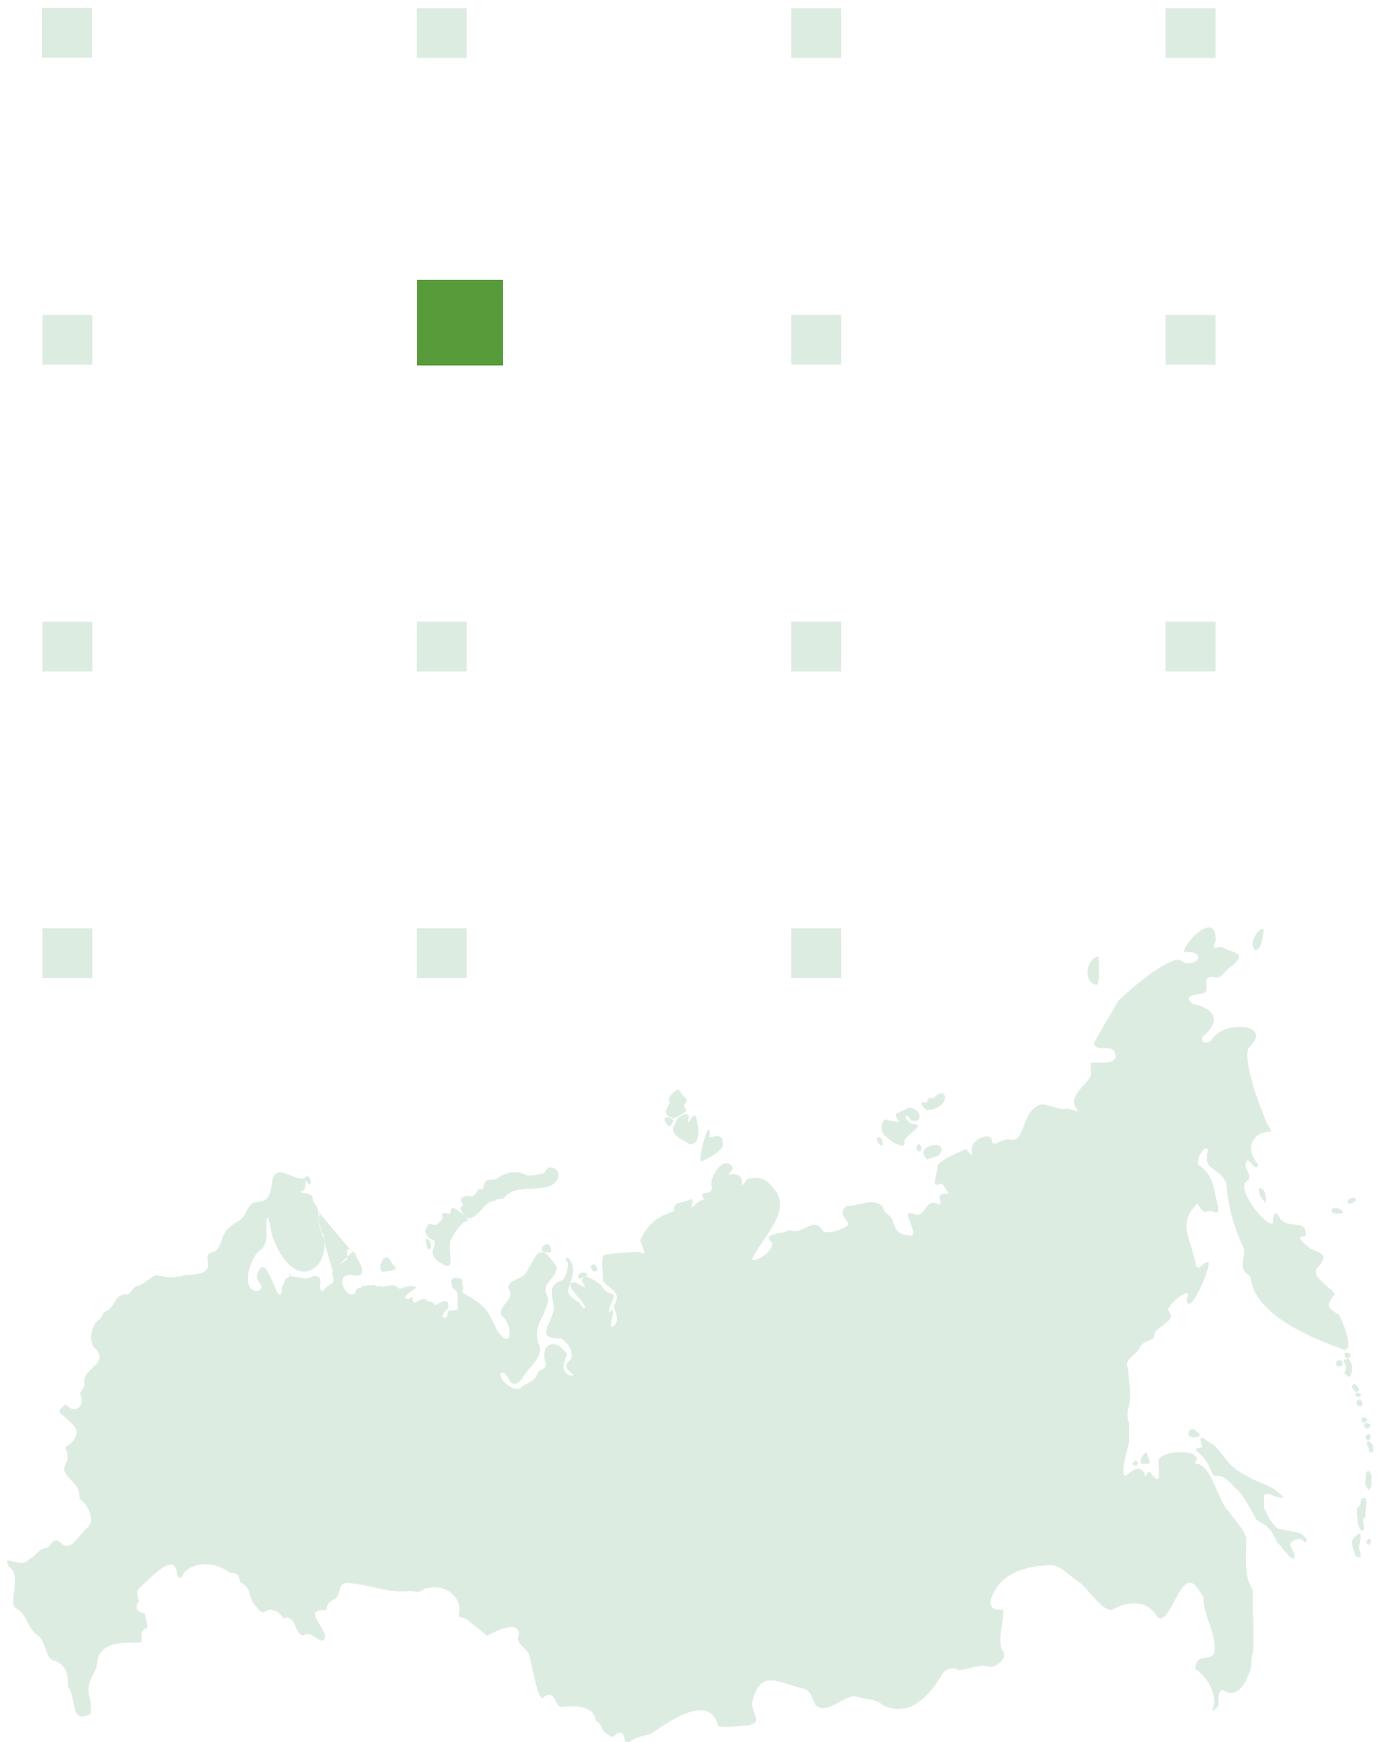

- Russian Agricultural Bank is one of the top 10 Russian banks in terms of capital (Rating of the «Profile» magazine);
- RAB is ranked 7 in terms of shareholder equity (Rating of the «Profile» magazine);
- RAB is ranked 8 in terms of assets (Russian Business Consulting data);
- RAB has the second largest branch network (Russian Business Consulting data);
- The Russian Government and local authorities provide support to the regional presence of RAB;
- In 2006 the number of RAB regional offices increased by a record number of 450.

At the same time, according to the data of the «Banker» magazine, RAB has joined world's 1000 largest banks in terms of capital and it is ranked 729 (the rating included only 22 Russian banks). High international ratings characterize RAB as a financial

institution of the international standing and reflect the high level of the Bank's investment appeal. RAB's international ratings allowed it to be included in the list of financial institutions, whose debt instruments are accepted by the Bank of Russia as collateral.

Special status and the solid financial results of Russian Agricultural Bank make the Bank quite recognizable in the international banking landscape.

RECORD LOAN PORTFOLIO AND ASSETS QUALITY

RECORD LOAN PORTFOLIO AND ASSETS QUALITY

RAB's credit policy stipulates that at least 70% of its loan portfolio should consist of loans to borrowers in the agricultural industry and related sub-sectors. This high degree of specialization has allowed RAB to develop expertise in lending to agricultural producers, agricultural commodity traders, food processing enterprises and other companies that produce goods for, or provide services to the agribusiness. RAB's market niche allows it to operate in an environment in which there is relatively little competition from other banks for loans to borrowers operating in the agricultural industry, particularly small businesses and individuals.

RAB participates in a range of programs of the Russian Government to support the agribusiness and related sub-sectors. RAB's participation in such programs includes lending for grain purchase interventions, providing loans to agricultural consumer and credit cooperatives and lending secured by mortgages on agricultural land plots. RAB also focuses on financing purchases of modern agricultural machinery and equipment and has recently begun to place a greater emphasis on making consumer loans to individuals residing in small towns and rural areas in Russia who are involved in agricultural production.

In 2006 the scale and quality of RAB operations increased considerably. Some of important developments for the Bank over the course of 2006 were:

- Participation in the National Priority Project on Agribusiness Development as one of the main parties to this government program;
- Material buildup of the capital base;
- High rate of growth of the volumes and sources of raised funds;
- Considerable growth of the credit portfolio and in particular of long-term loans;
- Broadening of the range of loan products offered by the Bank to its customers;
- Multi-level support of the small farms and enterprises in rural areas;
- Considerable growth of the regional branch network;
- Dynamic consolidation of the financial position.

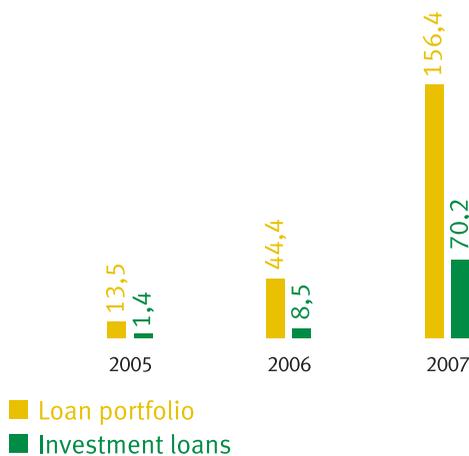

Key Results

In 2006 RAB continued its expansion into the rural areas and as of 1st of January 2007 its share in agribusiness financing in the Russian banking system reached ca. 40%. RAB's loan portfolio has increased 3,5 times and reached RUR 156,4 bln. The number of credits granted by the Bank in 2006 was 186 thousands, this is substantially more than 17,7 thousands loans for the total amount of RUR 54,9 bln. extended by the Bank in 2005.

Within the framework of National Priority Project on Agribusiness Development RAB has extended over 130 thousands credits to the total amount of RUR 70,5 bln.

The best results were shown in investment portfolio (loans over 1,5 year). The portfolio reached RUR 70,2 bln., that accounts for ca. 45% of the total credit portfolio.

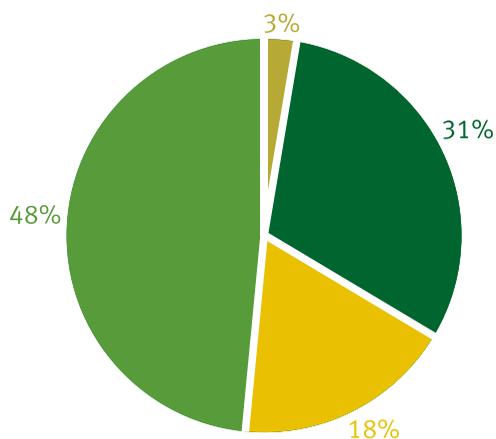

RAB's Loan Portfolio and Investment Loans, RUR bln.

Targeted split of 30% long-term to 70% short-term loans has been achieved in line with management goals in the beginning of the year. As of 1st of January 2007 long-term loans (>3 years) comprised almost 50% of the credit portfolio.

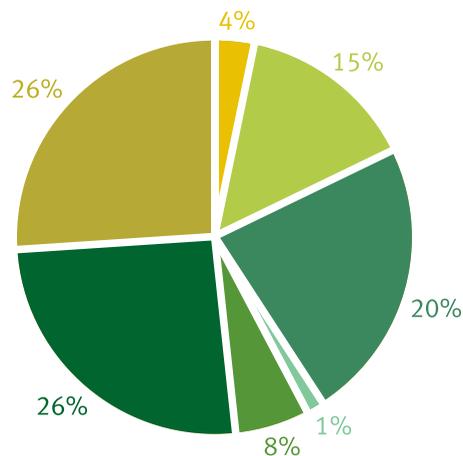

RAB's loan portfolio is well diversified geographically. Naturally, majority of loans are granted to RAB's customers in agricultural regions.

Loans Breakdown by Maturity

- 2-180 days
- 180 days - 1 year
- 1-3 years
- > 3 years

RAB's Loan Portfolio by Region

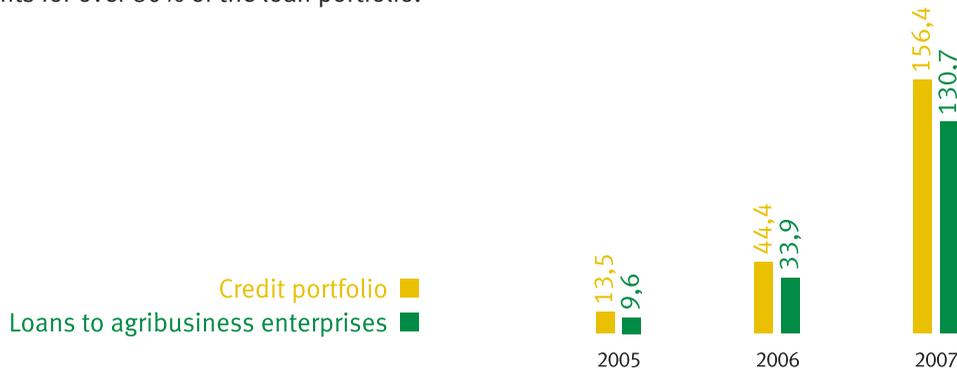

- Far East
- Siberian
- North-West
- South
- Povoljjsky
- Ural
- Central

The quality of the loan portfolio was not impacted by its growth. In addition, the proportion of the credit assets to customers with generated good credit history grew significantly resulting in a stronger basis for the improvement of asset quality. As of January 1st, 2007 non-performing loans (NPL) constituted only 0,7% compared to 1,12% as of January 1st, 2006.

Credit Portfolio Structure

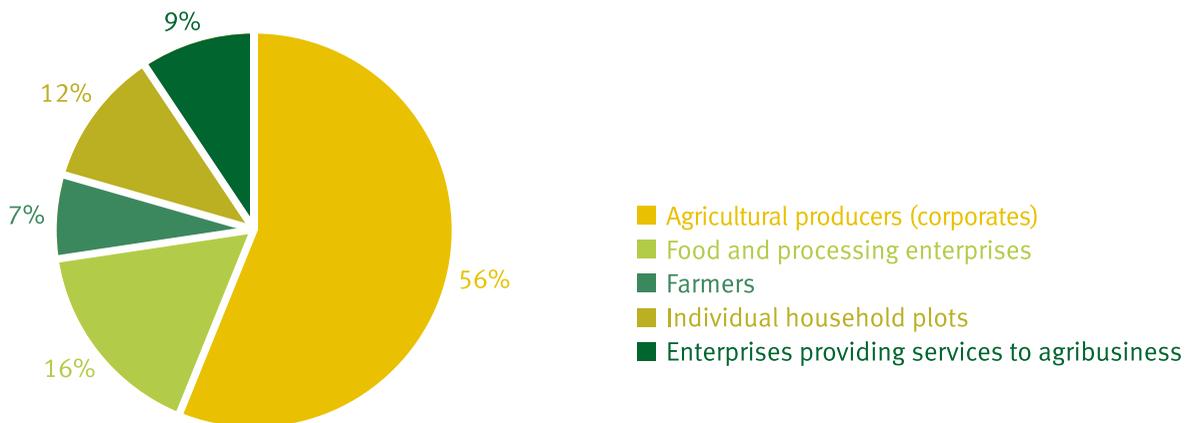

Agribusiness is the main recipient of loans from the Bank, it accounts for over 80% of the loan portfolio.

RAB's Credit Portfolio Structure

The main part of the loan portfolio was extended to agricultural producers (these included individual household plots). Following is the breakdown of the part of the loan portfolio of the Bank, allocated to the agribusiness sector:

RAB's Loan Portfolio Split in Agriculture

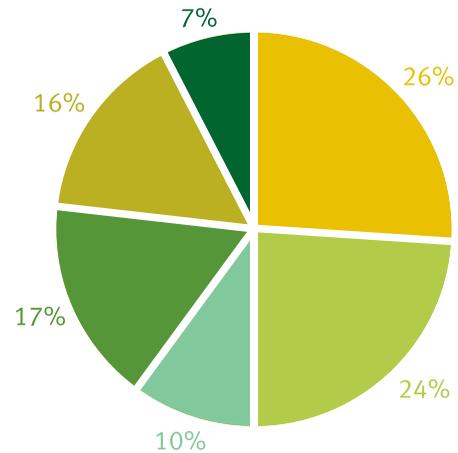

The breakdown of the RAB's loan portfolio reflects its strategic role in lending to the Russian agribusiness sector and the credit policy stating that at least 70% of lending is to be made in this sector. Agribusiness itself is very well diversified, it includes crops and perennial plants, growing cereals, edible oils, feed crops, potato and vegetable growing, livestock, pig breeding, poultry, fur-bearing animals, fisheries and enterprises for harvesting and processing of maritime biological resources in coastal regions and inland water reservoirs, reclamation of agricultural lands, etc.

The most demanded products offered by RAB in 2006 were investment credits for construction, reconstruction and refurbishment of animal breeding farms, purchase of modern machinery and equipment, pedigree livestock and perennial planting. Among the most requested types of crediting were loans to individual household plots owners, consumer lending to rural population in the framework of the implementation of the Federal Program on the social development of rural areas and improvement of life quality of rural population.

Adequate insurance of assets provided to the Bank as collateral for loans is an important part of the lending process.

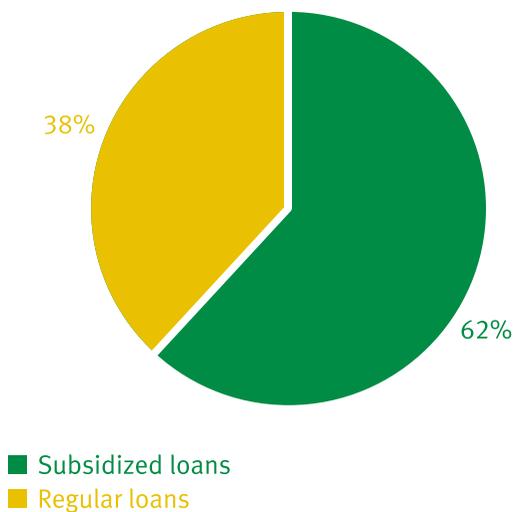

Collateral Structure

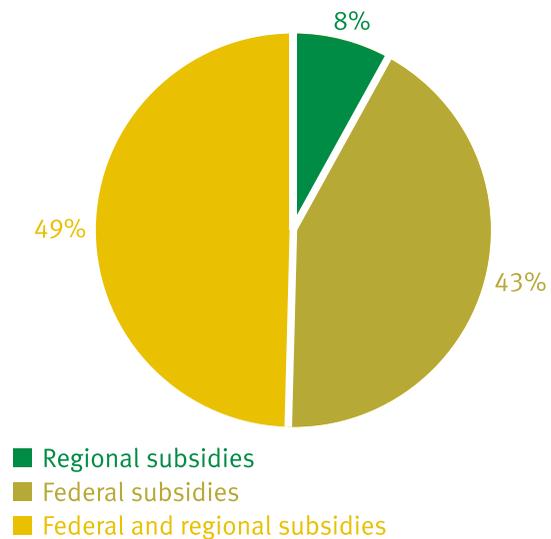

Subsidies. RAB's clients - agricultural producers participate in Federal and regional programs under which they receive reimbursement of the paid interest rate in the form of subsidies from the Federal and/or regional budgets for a part of their interest costs.

Subsidies calculation is based on the Bank of Russia interest rate, where federal subsidies cover 2/3, regional subsidies - up to 1/3.

Loan portfolio breakdown by Subsidies

Sources of the Subsidies

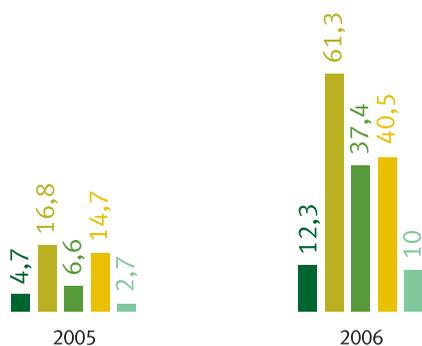

Strategic lines of banking operations in 2006 were governed by the objectives to provide credit and financial support to the agricultural producers, to support reconstruction of the country's agricultural production potential and improvement of the socio-economic environment in the rural area and the strengthening of the national food security.

Agricultural producers, food and processing enterprises including personal household plots were granted over 135 thousands loans for the amount over RUR 130,7 bln., four times more compared to the previous year.

Funds Growth and Diversification

In 2006 RAB considerably strengthened its funding base by increasing proprietary funds (capital) and raised sources — client accounts, deposits, debentures — bonds, promissory notes, interbank loans. RAB achieved significant growth of funds by sources, instruments and terms. The total volume of the funds raised as of 1st of January 2007 was RUR 161,5 bln., this is 3 times more compared to 2005. In spite of high growth rates funds are well diversified.

Funds Growth and Diversification

- Balances on the current and settlement accounts
- Deposits and raised funds (including eurobonds)
- Interbank loans and corporate deposits
- Promissory notes
- Bonds

INTERNATIONAL ACTIVITIES

INTERNATIONAL ACTIVITIES

Large-scale international activities of Russian Agricultural Bank in 2006 demonstrate its new level of development and its recognition by the world financial institutions and international investors as a reliable partner in the area of banking services, export-import transactions of agricultural products and equipment and international settlements.

Ratings

An important event of the year was an upgrade of RAB ratings by the international rating agencies Fitch Ratings and Moody's Investors Service.

In 2006 Fitch Ratings upgraded Russian Agricultural Bank's Issuer Default rating twice.

First, on 28th April 2006 RAB's Issuer Default rating (IDR) was upgraded to «BBB» from «BBB-» and National Long-term rating to «AAA(rus)» from «AA+(rus)», both Outlooks remained Stable.

Second, on 27th July 2006 Fitch upgraded IDRs of RAB to «BBB+» from «BBB» with a Stable outlook following the upgrade of the Russian sovereign foreign and local currency IDRs to «BBB+» from «BBB». At the same time Short-term rating was upgraded to «F2» from «F3». Russian Agricultural Bank was among 10 Russian banks that followed the upgrade of the Russian sovereign ceiling. This decision reflects Fitch's view of the Russian authorities' improved

capacity to support RAB if required. After the annual meeting, on 5th September 2006 Fitch has upgraded Individual rating to «D» from «D/E».

As a result ratings assigned by Fitch are Issuer Default rating «BBB+», National Long-term rating «AAA(rus)», Short-term rating «F2» and Individual «D».

Ratings assigned by Moody's are: Long-term «Baa2», positive; Short-term «Prime-2», stable; Financial strength «E+», stable; National scale «Aaa.ru» long-term and «RUS-1» short-term.

The ratings confirm the credit quality of RAB as a stable financial institution of international standing and reflect its high level of investment appeal.

Capital market

The Bank's overall performance earned it repeated upgrades from the leading rating agencies and caught the eye of international investors, who have eagerly participated in RAB's ruble and foreign currency bond issues.

RAB successfully develops the market of its own obligations and has become one of 20 Russian banks whose bonds are accepted by the Bank of Russia as collateral.

In 2006 RSHB Capital S.A. (SPV) organized the following placements of the notes with the sole purpose to finance loans to RAB:

Issue	Ratings Moody's/ Fitch	Date	Maturity	Amount, USD
LPN	Baa1 / BBB+	18.11.2005	29.11.2010	250 000 000
LPN	Baa1/BBB+	10.02.2006	29.11.2010	100 000 000
LPN (EMTN)	A3 / BBB+	11.05.2006	16.05.2013	700 000 000
Subordinated issue of LPN	Baa1 / BBB	19.09.2006	19.09.2016	500 000 000

The success of the Eurobond issuances is determined by the well-defined strategy, the bank's expertise in the capital markets and the solid support that RAB offers to the Russian Government, acting as its key agent in providing services to the agribusiness sector.

Foreign trade

To satisfy its clients requirements for financing of foreign trade operations RAB actively develops cooperation with first-rate foreign credit organization and expands its activities in the area of correspondent relations.

As of 1st January 2007 RAB established correspondent relations with more than 70 foreign banks, this is 1,5 times more compared to 2005. RAB has concluded 33 agreements with foreign banks, that is significantly more than in 2005. In 2006 RAB expanded its network of foreign banks — partners in foreign trade operations. Nowadays among RAB partners are banks from Austria, Belgium, Czech Republic, Denmark, France, Germany, Great Britain, Hungary, Japan, Israel, Italy, Mongolia, the Netherlands, Spain, Sweden, Switzerland, USA and others.

RAB develops project, structured and investment finance programs. World Bank, International Monetary Fund, European Bank for Reconstruction and Development and International Finance Corporation are cooperation partners in developing these programs.

In 2006 a number of foreign banks established credit lines on RAB for the total amount of about \$100 mln.

The Bank established a trade facilitation program designed to provide support to its clients in servicing foreign trade activity. RAB operates a wide range of trade finance and forfeiting instruments facilitating export and

import operations of Russian companies. Structured trade and commodity finance is a growing business cluster for the bank. RAB is also accredited by major ECAs worldwide and has a number of CGF (credit guarantee facility) lines in operation.

Accreditation of the Bank by leading credit export agencies allows it to attract affordable financial resources for the financing of the structured trade contracts. The number of the ECA's partners of the Bank in different countries is growing and has reached 19 as of 1st January, 2007.

Export Credit Agencies — partners of the Bank:

ASHRA Israel, ATRADIUS Netherlands, CESCE Spain, COFACE France, ECGD UK, EDC Canada, EGAP Czech republic, EKF Denmark, EKN Sweden, ERG Switzerland, Ex-Im Bank USA, Eurler Hermes Germany, FINNVERA Finland, IFTRIC Israel, KUKI Poland, OeKB Austria, ONDE Belgium, NEXI Japan, SACE Italy, Sinosure China.

An important achievement of RAB was the approval of the transaction with Deere Credit by US Ex-Im Bank. This transaction contributed substantially to the establishment of high level of confidence of the American investors in RAB, that played positive role for the placement of LPN in May 2006.

RAB noticeably strengthened its positions as a leading supplier of the services in the area of export-import operations in agribusiness. In 2006 the volume of documentary operations such as LC and guarantees grew substantially in the following areas:

- Project finance of end-use borrower;
- Short-term and long-term crediting of export-import operations;
- Trade finance of agricultural machinery and processing equipment, as well as pedigree livestock purchases;
- Pre-export financing.

These operations provide RAB with additional non-interest income.

In 2006 RAB has issued about 70 Letters of Credit to the total amount of ca. \$79,2 mln. — in 2005 only 8 LC to the total amount of \$6,3 mln. RAB advised 136 guarantees to the total amount of \$98,9 mln. — in 2005 14 guarantees to the total amount of \$7,4 mln. Altogether in 2006 documentary operations increased 9 times by the number and 13 times by the amount as compared to 2005.

As of end 2006 RAB established credit lines for documentary operations for the total amount of \$100 mln. Such lines allow RAB to execute transactions with foreign counterparties with a major benefit to the customer; they also contribute to the expansion of the international activities and raising foreign investments in the Russian economy.

Investors relations

RAB has developed a worldwide investors relations network and the Bank is recognized as a regular and trusted partner of international, as well of local, banks and institutions.

In 2006 RAB concluded 11 agreements with first-rate foreign banks for raising funds to the total amount ca. \$1,3 bln. High international ratings, positive credit history, audited IFRS reports and regular presence in international markets, confirm a high level of recognition of the Bank by international investment community.

The number of foreign financial institutions — partners of the bank is expected to grow and open new direct operational banking channels.

Membership

An important role in international relations in 2006 played the participation of the Bank in the activities of the Confédération Internationale du Crédit Agricole (CICA). Yuri V. Trushin, Chairman of RAB Executive Board is a constant member of CICA Central Committee.

Within the framework of CICA Russian Agricultural Bank developed a cooperation plan with one of the leading financial institutions targeted to develop relationships and international experience exchange in the area of banking services to agricultural enterprises. One of the components of the general plan is an advanced training program for regional branches directors that was launched in December 2006.

In 2006 RAB became a member of the U.S.-Russia Business Council (USRBC). The Bank also participates in the U.S. Department of Agriculture's export credit guarantee program (GSM-102) and is a member of The Russia-China Business Council (RCBC). Such memberships allow RAB to take advantage of additional potential for business development, strengthening of relations with international organizations and investment funds, establishment of new business contacts and to obtain and analyze market information.

In the September 2006 issue of New York based «Institutional Investor» magazine, RAB with its USD 800 million became top Russian debt issuer in the foreign bond markets.

RAB's success on the international scene was recognized by a number of international awards. In November 2006 two international awards were conferred upon Russian Agricultural Bank. «European Quality Award» was bestowed upon the Bank for its work to achieve high quality of bank services in accordance with European standards. Yuri V. Trushin, Chairman of the Board, became laureate of the «United Europe Award» for personal contribution to the development of European integration. The ceremony was organized by the Europe Business Assembly (EBA), an independent international project development and management organization situated in Oxford, United Kingdom, which stages multinational events in Europe.

Achievements and Awards on the International Scene

In July 2006 Russian Agricultural Bank joined «The Top 1000 World Banks», an influential list published by «THE BANKER» magazine. RAB became number 729. The number of Russian banks in the list was only 22.

CORPORATE GOVERNANCE

One of the main goals of Russian Agricultural Bank is to render to clients tailor-made products that closely match their needs and concerns, and to enable them to become long-term partners in a structure built on the values of proximity, responsibility and solidarity.

From the moment of its creation, this ambition and these values have underpinned the development of RAB and its regional bodies with an ongoing concern for adopting corporate governance and management rules of operation and action by making transparency and efficiency a priority.

RAB's policy of the governance is directed towards the fulfillment of long-term strategic goals and a positive evolution of financial results.

One of the key objectives set by RAB is the achievement of high international standards of corporate management and business ethics. Business processes and procedures in the Bank are designed to ensure the compliance with laws, rules and regulations.

During the year under review RAB continued to put into practice comprehensive measures to further improve the system of the corporate management, amid continuous evolution and regional expansion of the Bank. The process of business planning was improved. The organizational and functional structure was streamlined to facilitate the coordination between units.

The highest level of management and the ultimate decision making body of Russian Agricultural Bank is the General Shareholders' Meeting. This is followed by the Supervisory Board which is responsible for general supervision of RAB activities, including strategy and policy coordination. The Supervisory Board appoints Chairman of the Executive Board that is the sole management body of RAB and elects members of the Executive Board which is a collegiate management body. Chairman of the Executive Board presides at meetings of the Executive Board and together with the latter is responsible for day-to-day operations of RAB.

Committees

The special committees under the Executive Board are the decision-making bodies of Russian Agricultural Bank.

ALCO Committee

RAB ALCO Committee is headed by Chairman of the Executive Board and includes Deputy Chairman of the Board supervising RAB liabilities, Treasury Director, Deputy Chairman of the Executive Board supervising Credit Department, Risk Management Director, Finance and Tax Director, Chief Accountant, International Operations Director, Debt Capital Market Director Legal Counsel, Planning Director.

ALCO Committee meets at least once a week and reviews proposals to be considered by the Executive Board and prepares materials for the Executive Board on such matters as the implementation of RAB risk policy, adoption of internal procedures for financial risk management, approval of new funding terms that is provided to RAB and the use of such a funding.

ALCO Committee also performs other functions, including setting limits for branches, within the scope of its responsibilities delegated by the Executive Board.

Credit Committee

RAB Head Office Credit Committee is composed of a Deputy Chairman of the Executive Board, who serves as Chairman, Deputy Chief Accountant, Risk Management Director, International Operations Director, Funds Manager, Legal Counsel and Finance and Tax Director.

Credit Committee meets as often as three times a week, as needed. Credit Committee is responsible for approving the terms of individual credit transactions and elaboration of proposals to improve RAB credit policy. This includes, inter alia, establishment and modification of the criteria used by RAB in asset quality analysis and classification by risk category, development of provisioning procedures.

In addition to Head Office Credit Committee, RAB has regional branches credit committees as well as credit committees at the additional offices level that approve individual loans terms in regional branches and additional offices, respectively. Credit committees of regional branches also approve credit transactions of additional offices in excess of their established credit limits.

Technology Committee

Technology Committee is mainly responsible for considering matters, coordination of works and settlement of disputes arising from design and introduction of brand new banking products and services and information technologies supporting them, including:

- Forming of information technology development strategy;
- Perfection of existing and development of new banking technologies;
- Purchase, development and introduction of new system and technical tools for the purposes of Bank's management of technologies modernization.

The Committee is set up by the decision of the Executive Board and the representatives of the following units belong to it: Accounting Department, IT Department, Credit Department, Operational Department, Planning Department, Security Department, Finance and Tax Department.

Branch Network Development Committee

Branch Network Development Committee is responsible for forming of an effective regional branch network management system and within the limits of its powers considers and makes decisions relating to RAB's strategy of regional branch network development.

Members and Chairman of the Branch Network Development Committee are appointed by the order of Chairman of the Executive Board.

Internal Audit

Internal Audit is the main part of the system of RAB control bodies and an independent unit of the system. Internal Audit is accountable to and controlled by RAB Supervisory Board.

The key objectives of Internal Audit's activity are evaluation of the Bank's activities efficiency and risks mitigation. The body also controls the fulfillment by the staff of the Bank of its duties, the requirements of the legislation in force, including decrees and orders of the President of the Russian Federation, resolutions of the Russian Government and regulations of the Bank of Russia, and standards and norms of business ethics and the Bank's internal documents, which determine the policy of the Bank and regulate the operations of RAB.

The head of Internal Audit is appointed and dismissed by RAB Supervisory Board. Only a person with a working experience in banking institutions of not less than 5 years can be appointed to the position of Internal Audit Head. The head of Internal Audit cannot simultaneously manage any other units of the Bank. Combination of work in Internal Audit with work in other divisions is also prohibited.

The head of Internal Audit in his/her day-to-day activities is under control of the Chairman of the Executive Board and reports directly to the Chairman. Internal Audit personnel reports and is accountable to Internal Audit Head. Employees are appointed and dismissed by Chairman of the Executive Board as advised by Internal Audit Head.

Internal Audit acts in accordance with an annual audit plan subdivided into quarterly plans. The annual plan is subject to the approval by the Supervisory Board. A quarterly plan is composed in a framework of the annual plan and is subject to the approval by the Executive Board.

Subject to RAB Internal Audit Regulations employees of all the units of the Bank are to render assistance to the staff of Internal Audit in the performance of its functions.

In 2006 regular and special audits were conducted over key projects such as contracted deposits and deposit agreements, NPL, deferred and prepaid expenses, accounting of intangible assets. The Bank carried out on-site audits on the regional branches level.

RISK MANAGEMENT

The results achieved by Russian Agricultural Bank in 2006 are backed by the management of financial risks that is one of the essential components of sustainable and successful operations. RAB has developed a comprehensive risk strategy covering the evaluation, monitoring and management of the size and concentration of risks, arising from the activities of the Bank. The principal categories of risk inherent in the Bank's business are credit risk, market risks (including foreign currency risk, interest rate risk and securities portfolio risk), liquidity and operational risks.

The Bank's risk management is based on the principle of the separation of duties between departments performing risk assessment and business units involved in risk-related operations.

The risk management function is vertically organized and is performed in a centralized manner. The Bank established and improved the monitoring process in the entire bank and adopted different approaches to strike a balance between risk management and risk exposure.

The main stages of the risk management process include the following:

- Risks identification;
- Qualitative and, if necessary, quantitative assessment of specific risks;
- Setting aggregate risk thresholds and risks levels with regard to specific instruments and counterparties;
- Approval of levels of risk, generated by specific transactions and, where necessary measures to manage and reduce the risk exposures;
- Compliance monitoring of the established risk limits;
- Compliance with the Bank of Russia requirements.

Credit Risk

The Bank had developed a set of policies and procedures for credit risk management. It includes limits on portfolio exposures and monitoring and managing risks through the centralized risk management system. RAB manages its overall credit risk by establishing limits on risk exposures to individual borrowers and groups of related borrowers. The system also sets limits for maximum coverage provided by individual insurance companies in respect of the loans collateral. RAB has restrictions for the types of banking operations where it can be engaged.

Most of the Bank's exposure to credit risk is concentrated in agricultural industry. However, the credit risk on agricultural industry is diversified through wide spread of borrowers across Russian regions and through different types of agricultural borrowers.

In order to reduce exposure to the credit risk of borrowers from specific regions and to limit risks relating to performance of the agricultural industry in different regions of the Russian Federation, RAB sets aggregate limits for loans issued at the regional branch level as well as limits for certain types of loans made at the regional branch level. RAB also sets the lending limits for lending operations of RAB's additional offices.

In the event the amount of a requested loan exceeds a lending limit set for an additional office, a loan application is transferred for review and approval to a regional branch. If a loan amount exceeds a lending limit set for a regional branch, a loan application is transferred for

review and approval to RAB Head Office. Lending limits are approved by the Supervisory Board and are reviewed on a regular basis.

In view of the importance of appropriate risk management RAB, along with establishing of limits for its additional offices and branches, provides loans secured by the mortgage of agricultural land; it also accepts guarantees from leading Russian companies.

The credit policy differentiated by geographic, regional economic, credit and operating environment, borrower size and regional concentration is integrated in credit risk management system. Post-disbursement management in particular has allowed Russian Agricultural Bank to achieve sound results in NPL levels.

Market Risks

The goal of the Bank's market risk management policy is to limit and reduce the amount of possible losses that may be incurred by the Bank as a result of its operations due to negative changes in exchange rates, interest rates and performance of equity and debt capital markets.

RAB manages market risks by setting limits on maximum exposures for specific instruments and potential losses for several types of operations in the open market. The Bank also manages its risks by diversifying a range of financial instruments used to hedge market risks and manage its short-term liquidity.

The Bank uses VAR (value-at-risk) analysis to assess currency risk and securities portfolio risk and to minimize potential losses. VAR analysis estimates the potential loss from adverse market movements, assuming a specified time horizon before positions can be adjusted and measured to a specific level of confidence. VAR analysis estimates are based on historical, parametrical and random numbers simulation that involves assessing the impact of historic market movements on current positions. The choice of optimal model depends on the assessment of the movement of the rates.

Liquidity Risk

Liquidity risk is the risk of mismatches between maturities of assets and liabilities. The Bank is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits, loan draw downs, guarantees and from margin and other calls on cash settled derivative instruments. RAB does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty.

RAB's liquidity risk management is split into:

- management of current and short-term liquidity (up to 30 days); and
- management of medium-term (from 30 days up to 1 year) and long-term (over 1 year) liquidity (strategic liquidity management).

The liquidity risk management process includes analysis of actual values and dynamics of mandatory liquidity ratios and risks taken by RAB by raising and placing funds, evaluation and management of RAB's liquidity in terms of the assets and liabilities structure, analysis of mismatches between RAB's assets and liabilities

and evaluation of RAB's cash flow position to determine the net liquidity position on a daily basis.

Liquidity is managed through purchases and sales of securities, interbank borrowing and lending and intraday and overnight borrowing from the CBR. RAB also issues debt instruments to manage its liquidity.

Operational Risk

RAB defines operational risk as the risk of loss resulting from inadequate or ineffective internal processes or methodologies, people and systems or from external events. This definition includes legal risk and reputational risk. Examples of events that are included under this definition of operational risk are losses from fraud, computer systems failures, settlement errors, model errors or natural disasters.

RAB has internal control system with respect to operational risks in place which comply with the Bank of Russia requirements. Internal Audit, Security Department and Chief Accountant monitor and control operational risks and report to the Executive Board. RAB also prepares and submits internal audit reports to the Bank of Russia. RAB's branches and the subsidiary bank are fully integrated within its internal control monitoring system. RAB believes that an effective monitoring process is essential for adequately managing operational risk. Regular monitoring activities offer the advantage of quickly detecting and correcting deficiencies in the policies and procedures for managing operational risks, which can reduce the potential frequency and/or severity of loss events.

RAB maintains servers with back-up systems in a separate office.

RAB is in compliance in all material respects with the Bank of Russia standards on IT system controls that the Bank of Russia adopted in 2005.

ANTI-MONEY LAUNDERING POLICY

■ ■ ■ ■

■ ■ ■ ■

■ ■ ■ ■

■ ■ ■ ■

ANTI-MONEY LAUNDERING POLICY

As a state-owned financial organization that offers banking and securities products and services to thousands of customers involved in the agribusiness sector, Russian Agricultural Bank recognizes and acts on its obligation to combat money laundering.

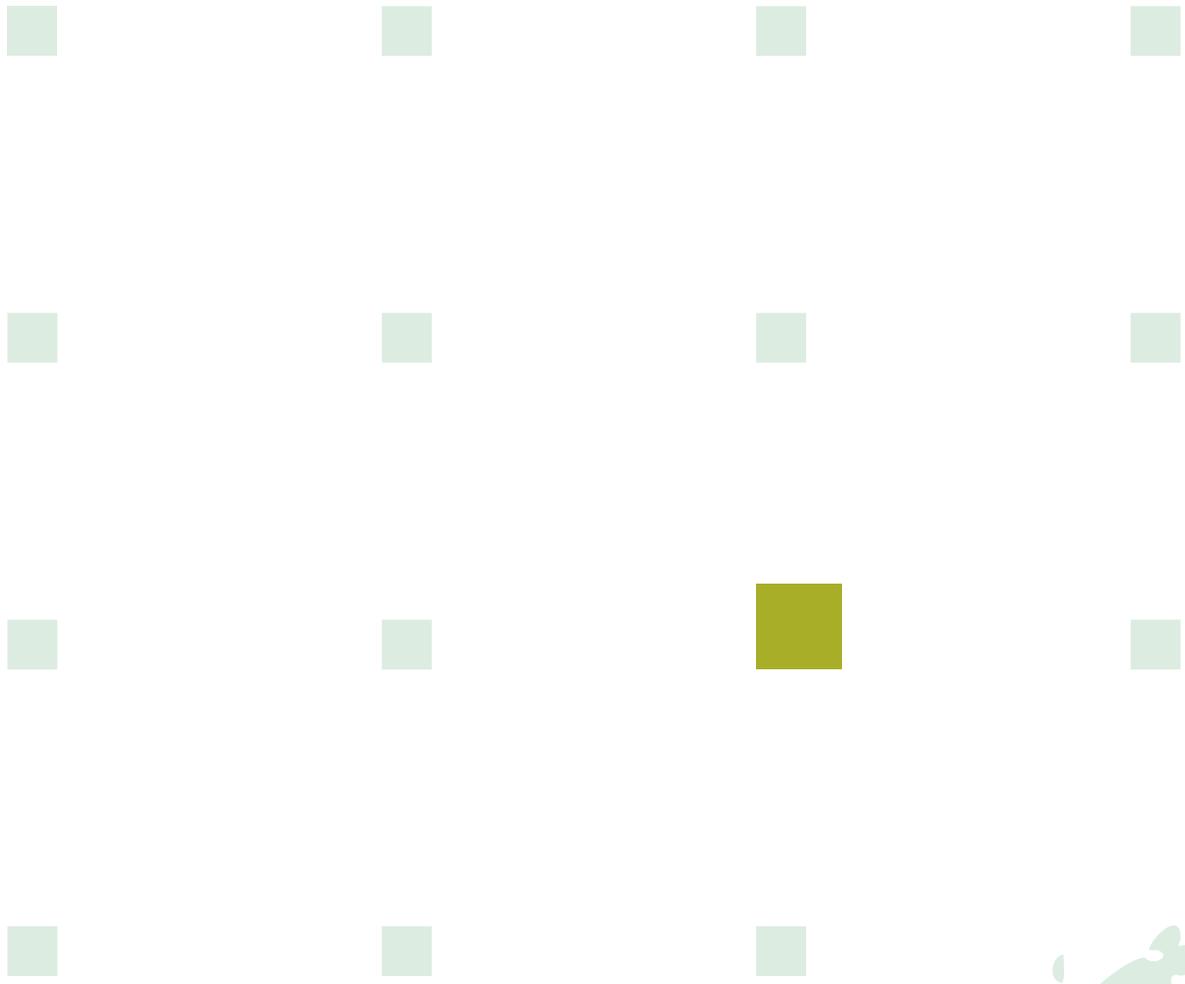

In accordance with the Federal Law dated 07.08.2001 N115-FZ «On Countering Legalization (Laundering) of Criminal Proceeds and Terrorist Financing» and taking into account recommendations of the Bank of Russia, RAB set up a system of internal rules and controls to prevent laundering of criminal proceeds and terrorist financing. These internal rules and controls also comply with national legislation, 40+9 Recommendations of the Financial Action Task Force (FATF), Standards of the Basel Committee on Banking Supervision and the Wolfsberg Anti-Money Laundering Principles.

RAB system of internal rules and controls includes:

- Identifying and gathering information on clients and beneficiaries according to the adopted Know Your Customer (KYC) policy;
- Disclosure and scrutiny of operations subject to the obligatory monitoring;
- Inquiries into suspicious operations in order to assess if particular operation is subject to reporting to the Financial Monitoring Service of the Russian Federation;
- Documenting and archiving the information about transactions subject to the control, based on regulatory or internal norms;
- Refusal procedures for account opening and execution of clients orders for specific transactions;
- Rules for procedures of account and transaction freezing;
- Anti-Money Laundering/Combating Financing of Terrorism (AML/CFT) training programs for the employees of the Bank;
- Provisions for confidentiality;
- AML/CFT internal procedures.

RAB continuously updates its policies and procedures, systems and technology in the area of AML/CFT. RAB staff is trained to ensure that it is well-equipped to combat money laundering and other financial crimes. RAB is fully committed to remain constantly vigilant to prevent the use of Bank's products and services in ways that could lead to breach of AML/CFT rules and regulations.

REGIONAL PERSPECTIVE

REGIONAL PERSPECTIVE

Russian Agricultural Bank's unique position in the agribusiness of the country is supported by one of the largest branch networks in Russia.

The objective of the development of regional network is to address the full scale of market potential of rural population. To achieve this RAB intends to expand its branch network and establish sales points in all agricultural regions of the Russian Federation. Regional presence is concentrated in rural areas with unsatisfied demand for banking services.

In 2006 RAB opened 5 regional branches and 446 additional offices. Now RAB provides banking services to clients in 77 constituent entities of Russia, has sales points in 73 regions, including 71 regional branch, one subsidiary bank and 762 additional offices.

About 1400 offices more are to be opened before 2009. Highly developed network of sales points will enable the Bank to provide affordable loans to small businesses and individuals in the agricultural industry and related sub-sectors more efficiently. This, in turn, will serve an important objective of the development of this sector of the Russian economy.

At the end of 2000 RAB had acquired Chelyabinskiy Commercial Land Bank (which at the time of acquisition had six branches operating in the Ural region) as a

part of its program to develop the branch network. Now Chelyabinskiy Commercial Land Bank is an agent for Russian Government's federal and regional programs for providing lending services to agricultural enterprises and is a leading bank of the Ural region in terms of subsidized lending.

Year 2006 saw a significant broadening of the capabilities of the additional offices of the Bank to provide banking products and services, particularly in the area of credit extension. This development was closely followed by increases in customer service quality.

RAB pays special attention to developing business relationships with local administrations. In the framework of cooperation with administrations of republics, regions and districts, RAB participates in regional programs aimed at the development of the economies, increase of investment appeal and stabilization of investment climate of the constituencies of the Russian Federation.

About 25 percent of the population of Russia lives in rural areas. Operations in the agricultural sector of Russian economy and in the rural areas are a major challenge and business opportunity. RAB intends to become the leading regional financial institution through using the advantage of its specialization and by applying international best practices and technology.

INFORMATION TECHNOLOGIES

INFORMATION TECHNOLOGIES

Russian Agricultural Bank considers information technology to be an integral part of its operations and is committed to continue investment in information technology to support the efficiency of the rapid growth of its operations.

For the fulfillment of banking operations purposes RAB uses Russian-engineered automated banking system (ABS), which serves as a single platform for its regional branches and additional offices and allows RAB to conduct operations on a real-time basis.

RAB has implemented a system of remote servicing of its corporate clients using the “Bank-Client” system. Currently, approximately 3 230 of RAB’s clients are serviced using this system. RAB also has an agreement with Microsoft for the supply of software necessary for RAB to operate its computer systems in the most effective manner.

To ensure the safety of collected data, RAB uses systems that keep back-up records of each operational day on reserve servers, such records being kept in specialized storage. RAB’s information technology systems are integrated with the back-up of communication and power supply systems.

Development of banking technologies of RAB is based on the plans of strategic development. With the purpose of solving the main strategic aims of the Bank and realization of RAB’s competitive advantages the incorporation of up-to-date management and banking technologies has begun. This includes optimization of business-processes and modernization of information technology platform of the Bank. One of the key steps in this direction is designing a new long-term IT development strategy of RAB. As an expert in this sphere a leading Russian consulting company Information Business Systems (IBS) was invited. The plan of work with IBS and further reengineering of business-processes envisages the utilization of ARIS methodology and software.

Carrying out of RAB’s technology modernization projects will allow to optimize existing business-processes and thus to raise the use of resources efficiency, to assure new banking products introduction, to favor operational risk mitigation, to perfect the Bank management quality and will become a prologue to the adoption of new capital adequacy measurement framework according with Basel II standards.

HUMAN RESOURCES POLICY

The achievement of 2006 goals was ensured by the Bank's personnel potential, its experience, professionalism and commitment. The future of the Bank depends to a large extent on an initiative of its staff, its educational level, capabilities and professional skills. RAB encourages personnel to enjoy its work and to develop professionally.

The HR Department operates to provide the Bank with highly educated and professional staff. Once a person is employed, HR Department works to develop, motivate, manage and promote him/her according to the performance.

The personnel policy of the Bank is based on a careful selection of employees. Hiring is done on a competitive basis. The high professional level of the Bank's employees is maintained by way of their professional training and by hiring persons with profound expertise and a substantial banking experience. Employing highly educated enthusiastic professionals is one of the Bank's main priorities and 75% of employees are university graduates or otherwise highly educated. All the medium- and top level managers have significant work experience in banking institutions. Every newly employed person receives orientation training. Further training is provided through seminars and special programs. RAB has developed an employee succession plan to ensure continuous development and expansion of the Bank. Due to the efficient HR policy the drain of qualified staff is brought to its minimum.

The Bank's management strives to attract younger personnel with a good potential; the average age of the Bank's employees is 37 years and of the management team — 46 years.

To maintain high levels of professionalism and stay abreast of changes in the Russian banking system RAB has regular training programs for employees organized by the Bank of Russia, Association of Russian Banks, etc. There are rotation programs of in-job training within the frames of cooperation with foreign banking partners as well. These programs allow RAB to benefit from

international experience sharing in the sphere of providing financial services to agribusinesses and to develop the mutual cooperation. There is also a system of corporate training in the Bank, within the framework of which the training of regional branches and additional offices management is conducted. The advanced training programs for regional branches directors are being implemented by RAB in cooperation with one of world's leading financial institutions.

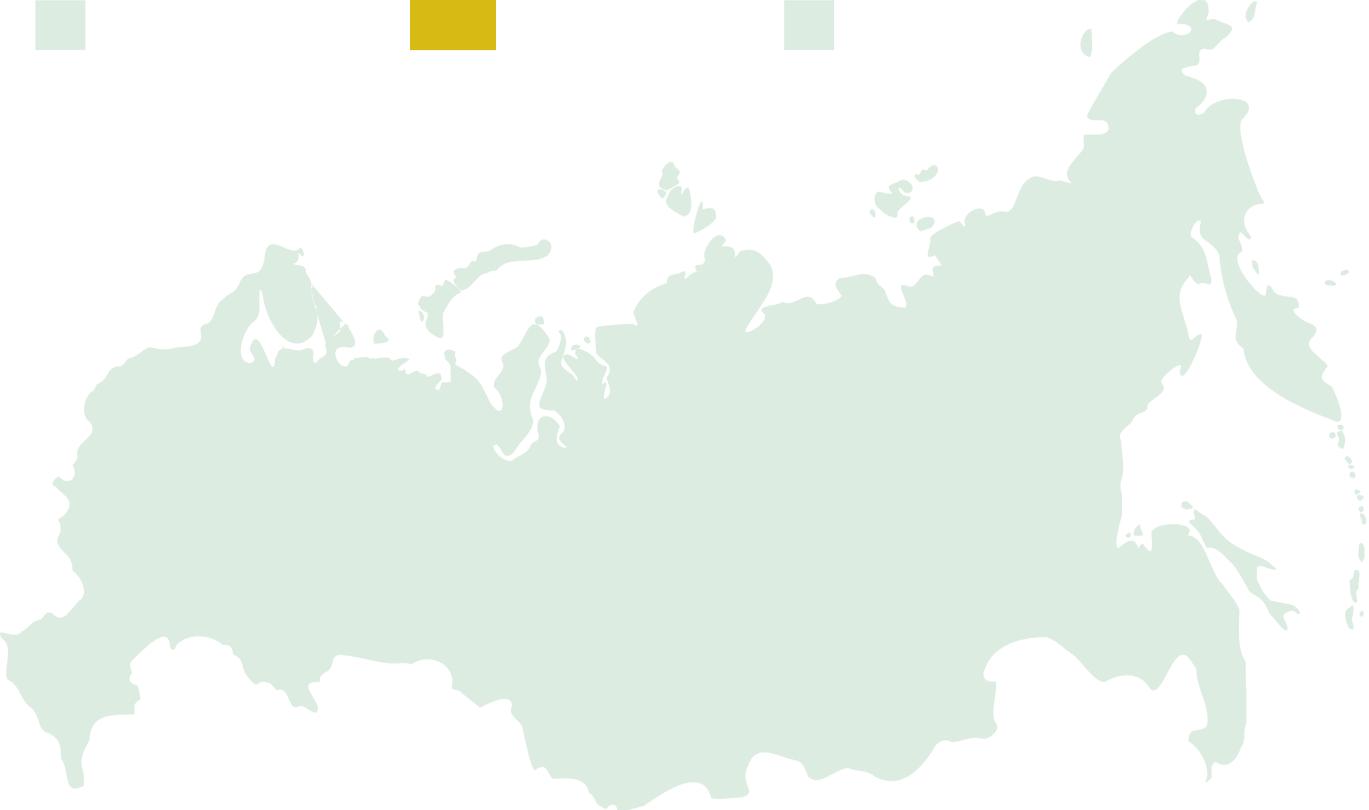

Special attention is attached to employees social package. Each staff member is provided with medical insurance.

In 2006 HR Department has worked to enhance the following areas:

- efficiency improvement of selection and positioning of the personnel, its harmonization of its performance with the current targets of the Bank;
- further personnel training, building work teams capable to ensure improved quality and results of the Bank's activity;
- creation and implementation of an optimal system to stimulate by material and non-material incentives development of employees initiative;
- corporate culture development, building a team targeted to achieve strategic objectives of the Bank.

As of January 1, 2007 RAB was staffed with 10,7 thousand employees, of whom almost 10 thousand (93%) were employed at the regional branches and additional offices. As compared to 2005, the number of staff has doubled. Such an increase in the number of personnel was predetermined by the expansion of regional branches and additional offices network, the growth of the range of services provided by the Bank and the activity growth.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders and the Supervisory Board of Russian Agricultural Bank Group:

- 1 We have audited the accompanying consolidated financial statements of Open Joint-Stock Company Russian Agricultural Bank and its subsidiary (the «Group») which comprise the consolidated balance sheet as at 31 December 2006 and the consolidated income statement, consolidated statement of changes in equity and consolidated statement of cashflows for the year then ended and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

- 2 Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

- 3 Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.
- 4 An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.
- 5 We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

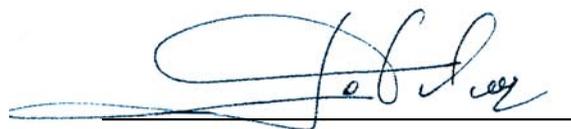

- 6 In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as of 31 December 2006, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Introduction

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards for the year ended 31 December 2006 for Open Joint-Stock Company Russian Agricultural Bank (the «Bank») and its subsidiary, Closed Joint-Stock Company Chelyabinsky Commercial Land Bank (together referred to as the «Group»). The Group also consolidates a special purpose entity RSHB Capital S.A., a company incorporated in Luxembourg in 2005 and governed through its foundation documents under the laws of the

Netherlands. RSHB Capital S.A. has been established as a special purpose vehicle for the sole purpose of issuing Eurobonds and lending the issue proceeds to the Bank (refer to Notes 16 and 17). Refer to Note 32 for information about the subsidiary and special purpose entity. The Bank was incorporated and is domiciled in the Russian Federation. The Bank is an open joint-stock company limited by shares and was set up in accordance with Russian regulations.

The Bank's only shareholder is the Government of the Russian Federation represented by the Federal Agency for Managing State Property. The Bank's principal business activity is commercial and retail banking operations in the Russian Federation with emphasis on lending to agricultural enterprises. The main objectives of the Bank are:

- To participate in realisation of the monetary policy of the Russian Federation in the area of agricultural production;
- To develop within the agricultural industry a national system of lending to the domestic agricultural producers; and
- To maintain an effective and uninterrupted performance of the settlement system in the area of agricultural production across the Russian Federation.

The Bank has operated under a full banking license issued by the Central Bank of the Russian Federation («CBRF») since 13 June 2000. The Bank participates in the state deposit insurance scheme, which was introduced by the Federal Law № 177-FZ «Deposits of individuals insurance in Russian Federation» dated 23 December 2003. The State Deposit Insurance Agency guarantees repayment of 100% of individual deposits up to RR 100 thousand and repayment of 90% of individual deposits in excess of 100 thousand up to a limit of RR 400 thousand per individual in case of the withdrawal of a license of a bank or a CBRF imposed moratorium on payments.

The Bank has 71 (2005: 66) branches within the Russian Federation. The Bank's registered address is: 119034 Russia, Moscow, Gagarinsky lane, 3.

The number of the Group's employees as at 31 December 2006 was 10 986 (31 December 2005: 5 324).

Activities of the Group include deposit taking and commercial lending, foreign exchange dealing, cash operations and securities trading. These activities are conducted principally in Russia.

These consolidated financial statements are presented in thousands of Russian Roubles («RR thousands»).

Operating Environment of the Group

The Russian Federation displays certain characteristics of an emerging market, including the existence of a currency that is in practice not convertible in most countries outside of the Russian Federation, relatively high inflation and strong economic growth. The banking sector in the Russian Federation is sensitive to adverse fluctuations in confidence and economic conditions and may occasionally experience reductions in liquidity. Management is unable to predict all developments which could have an impact on the banking sector and consequently what effect, if any, they could have on the financial position of the Group.

The tax, currency and customs legislation within the Russian Federation is subject to varying interpretations, and changes, which can occur frequently. Furthermore, the need for further developments in the bankruptcy laws, the absence of formalised procedures for the registration and enforcement of collateral, and other legal and fiscal impediments contribute to the difficulties experienced by banks currently operating in the Russian Federation. The future economic direction of the Russian Federation is largely dependent upon the effectiveness of economic, financial and monetary measures undertaken by the Government, together with tax, legal, regulatory, and political developments.

Summary of Significant Accounting Policies

Basis of Preparation. These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards («IFRS») under the historical cost convention, as modified by the revaluation of financial instruments categorised as at fair value through profit or loss (trading securities and derivatives). The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated (refer to Note 5, Adoption of New or Revised Standards and Interpretations).

Consolidated financial statements. Subsidiaries are those companies and other entities (including special purpose entities) in which the Group, directly or indirectly, has an interest of more than one half of the voting rights or otherwise has power to govern the financial and operating policies so as to obtain benefits. The existence

and effect of potential voting rights that are presently exercisable or presently convertible are considered when assessing whether the Group controls another entity. Subsidiaries are consolidated from the date on which control is transferred to the Group (acquisition date) and are deconsolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries. The cost of an acquisition is measured at the fair value of the assets given up, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. The date of exchange is the acquisition date where a business combination is achieved in a single transaction, and is the date of each share purchase where a business combination is achieved in stages by successive share purchases.

The excess of the cost of acquisition over the acquirer's share of the fair value of the net assets of the acquiree at each exchange transaction is recorded as goodwill. The excess of the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities acquired over cost («negative goodwill») is recognised immediately in profit or loss.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values at the acquisition date, irrespective of the extent of any minority interest. The difference, if any, between the fair values of the net assets at the dates of exchange and at the date of acquisition is recorded directly in equity.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the cost cannot be recovered. The Bank and all of its subsidiaries use uniform accounting policies consistent with the Group's policies.

Minority interest is that part of the net results and of the net assets of a subsidiary attributable to interests which are not owned, directly or indirectly, by the Bank. Minority interest forms a separate component of the Group's equity.

Key measurement terms. Depending on their classification, financial instruments are carried at fair value or amortised cost as described below.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Fair value is the current bid price for financial assets and current asking price for financial liabilities which are quoted in

an active market. For assets and liabilities with offsetting market risks, the Group may use mid-market prices as a basis for establishing fair values for the offsetting risk positions and apply the bid or asking price to the net open position as appropriate. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange or other institution and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Valuation techniques such as discounted cash flows models or models based on recent arms length transactions or consideration of financial data of the investees are used to fair value certain financial instruments for which external market pricing information is not available. Valuation techniques may require assumptions not supported by observable market data. Disclosures are made in these financial statements if changing any such assumptions to a reasonably possible alternative would result in significantly different profit, income, total assets or total liabilities.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial instrument. Incremental cost is one that would not have been incurred if the transaction had not taken place. Transaction costs include fees and commissions paid to agents (including employees acting as selling agents), advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

Amortised cost is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any write-down for incurred impairment losses. Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to maturity amount using the effective interest method. Accrued interest income and accrued interest expense, including both accrued coupon and amortised discount or premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of related balance sheet items.

The effective interest method is a method of allocating interest income or interest expense over the relevant period so as to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount. The

effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the net carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate (refer to income and expense recognition policy).

Initial recognition of financial instruments. Trading securities, derivatives and other financial instruments at fair value through profit or loss are initially recorded at fair value. All other financial instruments except loans from government are initially recorded at fair value plus transaction costs. Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets.

Loans from government are initially recorded at cost (being the issue proceeds), net of transaction costs, and subsequently measured at amortised cost.

All purchases and sales of financial assets that require delivery within the time frame established by regulation or market convention («regular way» purchases and sales) are recorded at trade date, which is the date that the Group commits to deliver a financial asset. All other purchases and sales are recognised on the settlement date with the change in value between the commitment date and settlement date not recognised for assets carried at cost or amortised cost; recognised in profit or loss for trading securities, derivatives and other financial assets at fair value through profit or loss; and recognised in equity for assets classified as available for sale.

Cash and cash equivalents. Cash and cash equivalents are items which can be converted into cash within a day. All short term interbank placements, beyond overnight placements, are included in due from other banks. Amounts, which relate to funds that are of a restricted

nature, are excluded from cash and cash equivalents. Cash and cash equivalents are carried at amortised cost. **Mandatory cash balances with the CBRF.** Mandatory cash balances with the CBRF represent noninterest bearing mandatory reserve deposits which are not available to finance the Group's day to day operations. Therefore, they are not considered as part of cash and cash equivalents for the purposes of the consolidated cash flow statement.

Trading securities. Trading securities are securities, which are either acquired for generating a profit from short-term fluctuations in price or trader's margin, or are securities included in a portfolio in which a pattern of short-term trading exists. The Group classifies securities as trading securities if it has an intention to sell them within a short period after purchase. Trading securities are not reclassified out of this category even when the Group's intentions subsequently change.

Trading securities are carried at fair value. Interest earned on trading securities calculated using the effective interest method is presented in the consolidated income statement as interest income. Dividends are included in dividend income within other operating income when the Group's right to receive the dividend payment is established. All other elements of the changes in the fair value and gains or losses on derecognition are recorded in profit or loss as gains less losses from trading securities in the period in which they arise.

Due from other banks. Amounts due from other banks are recorded when the Group advances money to counterparty banks with no intention of trading the resulting unquoted non-derivative receivable due on fixed or determinable dates. Amounts due from other banks are carried at amortised cost.

Loans and advances to customers. Loans and advances to customers are recorded when the Group advances money to purchase or originate an unquoted non-derivative receivable from a customer due on fixed or determinable dates and has no intention of trading the receivable. Loans and advances to customers are carried at amortised cost.

Impairment of financial assets carried at amortised cost. Impairment losses are recognised in profit or loss when incurred as a result of one or more events («loss events») that occurred after the initial recognition of the financial asset and which have an impact on the amount or timing of the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. If the Group determines that no objective

evidence exists that impairment was incurred for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics. Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets and the experience of management in respect of the extent to which amounts will become overdue as a result of past loss events and the success of recovery of overdue amounts. Past experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect past periods and to remove the effects of past conditions that do not exist currently. Impairment losses are recognised through an allowance account to write down the asset's carrying amount to the present value of expected cash flows (which exclude future credit losses that have not been incurred) discounted at the original effective interest rate of the asset. The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account through profit or loss.

Uncollectible assets are written off against the related impairment loss provision after all the necessary procedures to recover the asset have been completed and the amount of the loss has been determined.

Credit related commitments. The Group enters into credit related commitments, including letters of credit and financial guarantees. Financial guarantees represent irrevocable assurances to make payments in the event that a customer cannot meet its obligations to third parties and carry the same credit risk as loans. Financial guarantees

and commitments to provide a loan are initially recognised at their fair value, which is normally evidenced by the amount of fees received. This amount is amortised on a straight line basis over the life of the commitment, except for commitments to originate loans if it is probable that the Group will enter into a specific lending arrangement and does not expect to sell the resulting loan shortly after origination; such loan commitment fees are deferred and included in the carrying value of the loan on initial recognition. At each balance sheet date, the commitments are measured at the higher of (i) the unamortised balance of the amount at initial recognition and (ii) the best estimate of expenditure required to settle the commitment at the balance sheet date.

Sale and repurchase agreements and lending of securities. Sale and repurchase agreements («repo agreements») are treated as secured financing transactions. Securities sold under sale and repurchase agreements are not derecognised. The securities are not reclassified in the balance sheet unless the transferee has the right by contract or custom to sell or repledge the securities, in which case they are reclassified as repurchase receivables. The corresponding liabilities are presented within due to other banks or customer accounts.

Securities purchased under agreements to resell («reverse repo agreements») are recorded as due from other banks or loans and advances to customers, as appropriate. The difference between the sale and repurchase price is treated as interest income and accrued over the life of repo agreements using the effective interest method.

Securities lent to counterparties are retained in the consolidated financial statements in their original balance sheet category unless the counterparty has the right by contract or custom to sell or repledge the securities, in which case they are reclassified and presented separately. Securities borrowed are not recorded in the consolidated financial statements, unless these are sold to third parties, in which case the purchase and sale are recorded in profit or loss within gains less losses arising from trading securities. The obligation to return the securities is recorded at fair value in due to other banks or customer accounts.

Promissory notes purchased. Promissory notes purchased are included in trading securities, or in due from other banks or in loans and advances to customers, depending on their substance and are recorded, subsequently remeasured and accounted for in accordance with the accounting policies for these categories of assets.

Investments in agricultural cooperatives. Investments in agricultural cooperatives are made by the Bank as part of its participation in the National Project «Development of the Agro-Industrial Sector». These investments represent term contributions to cooperatives and bear fixed annual dividend income on amount of contributions made, which is included in interest income in the consolidated income statement. Investments in agricultural cooperatives are included in loans and advances to customers. Investments in agricultural cooperatives are carried at amortised cost.

Derecognition of financial assets. The Group derecognises financial assets when (i) the assets are redeemed or the rights to cash flows from the assets otherwise expired or (ii) the Group has transferred substantially all the risks and rewards of ownership of the assets or (iii) the Group has neither transferred nor retained substantially all risks and rewards of ownership but has not retained control. Control is retained if the counterparty does not have the practical ability to sell the asset in its entirety to an unrelated third party without needing to impose additional restrictions on the sale.

Premises and equipment. Premises and equipment are stated at cost, restated to the equivalent purchasing power of the Russian Rouble as at 31 December 2002 for assets acquired prior to 1 January 2003, less accumulated depreciation and provision for impairment, where required. Cost of premises and equipment of acquired subsidiaries is the estimated fair value at the date of acquisition.

Construction in progress is carried at cost, restated to the equivalent purchasing power of the Russian Rouble at 31 December 2002 for assets acquired prior to 1 January 2003, less provision for impairment where required. Cost includes borrowing costs incurred on specific or general funds borrowed to finance construction of qualifying assets. Upon completion, assets are transferred to premises and equipment at their carrying amount. Construction in progress is not depreciated until the asset is available for use. Costs of minor repairs and maintenance are expensed when incurred. Cost of replacing major parts or components of premises and equipment items are capitalised and the replaced part is retired.

If impaired, premises and equipment are written down to the higher of their value in use and fair value less costs to sell. A decrease in the carrying amount is charged to profit or loss. An impairment loss recognised for an asset in prior years is reversed if there has been a change

in the estimates used to determine the asset's value in use or fair value less costs to sell.

Gains and losses on disposals determined by comparing proceeds with carrying amount are recognised in profit or loss.

Depreciation. Land is not depreciated. Depreciation on other items of premises and equipment is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives at the following annual rates:

Premises	2.5%;
Equipment	5%-20%.

The residual value of an asset is the estimated amount that the Group would currently obtain from disposal of the asset less the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life. The residual value of an asset is nil if the Group expects to use the asset by the end of its physical life. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

Intangible assets. All of the Group's intangible assets have definite useful life and primarily include capitalised computer software.

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. Development costs that are directly associated with identifiable and unique software controlled by the Group are recorded as intangible assets if the inflow of incremental economic benefits exceeding costs is probable. Capitalised costs include staff costs of the software development team and an appropriate portion of relevant overheads. All other costs associated with computer software, e.g. its maintenance, are expensed when incurred. Capitalised computer software is amortised on a straight line basis over expected useful lives of five years.

Operating leases. Where the Group is a lessee in a lease which does not transfer substantially all the risks and rewards incidental to ownership from the lessor to the Group, the total lease payments, are charged to profit or loss on a straight-line basis over the period of the lease.

Due to other banks. Amounts due to other banks are recorded when money or other assets are advanced to the Group by counterparty banks. The non-derivative liability is carried at amortised cost. If the Group purchases its

own debt, it is removed from the consolidated balance sheet and the difference between the carrying amount of the liability and the consideration paid is included in gains or losses arising from retirement of debt.

Customer accounts. Customer accounts are non-derivative liabilities to individuals, state or corporate customers and are carried at amortised cost.

Promissory notes issued. Promissory notes issued by the Group include promissory notes denominated in Russian Roubles, US Dollars and Euro. Promissory notes are stated at amortised cost. If the Group purchases its own Promissory notes issued, they are removed from the consolidated balance sheet and the difference between the carrying amount of the liability and the consideration paid is included in gains arising from retirement of debt.

Other borrowed funds. Other borrowed funds represent amounts attracted from Eurobonds issue and bonds denominated in Russian roubles. Issued Eurobonds and bonds denominated in Russian roubles carry a coupon and are redeemable on a specific date. Other borrowed funds are carried at amortised cost.

Subordinated debt. Subordinated debt is measured at amortised cost. Creditors' claims on subordinated debt will be considered only after all claims of other creditors of the Group are satisfied.

Derivative financial instruments. Derivative financial instruments, including foreign exchange contracts (forwards and swaps) are carried at their fair value. Non-derivative transactions are aggregated and treated as a derivative when the transaction result, in substance, is a derivative.

All derivative instruments are carried as assets when fair value is positive and as liabilities when fair value is negative. Changes in the fair value of derivative instruments are included in gains/losses from derivative instruments. The Group does not apply hedge accounting.

Income taxes. Income taxes have been provided for in the consolidated financial statements in accordance with Russian legislation enacted or substantively enacted by the balance sheet date. The income tax charge comprises current tax and deferred tax and is recognised in the consolidated income statement except if it is recognised directly in equity because it relates to transactions that are also recognised, in the same or a different period, directly in equity.

Current tax is the amount expected to be paid to or recovered from the taxation authorities in respect of taxable profits or losses for the current and prior periods.

Taxable profits or losses are based on estimates if financial statements are authorised prior to filing relevant tax returns. Taxes, other than on income, are recorded within administrative and other operating expenses.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded for temporary differences on initial recognition of an asset or a liability in a transaction other than a business combination if the transaction, when initially recorded, affects neither accounting nor taxable profit. Deferred tax balances are measured at tax rates enacted or substantively enacted at the balance sheet date which are expected to apply to the period when the temporary differences will reverse or the tax loss carry forwards will be utilised. Deferred tax assets and liabilities are netted only within the individual companies of the Group. Deferred tax assets for deductible temporary differences and tax loss carry forwards are recorded only to the extent that it is probable that future taxable profit will be available against which the deductions can be utilised. Deferred income tax is provided on post acquisition retained earnings of subsidiaries, except where the Group controls the subsidiary's dividend policy and it is probable that the difference will not reverse through dividends or otherwise in the foreseeable future.

Provisions for liabilities and charges. Provisions for liabilities and charges are non-financial liabilities of uncertain timing or amount. They are accrued when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

Trade and other payables. Trade payables are accrued when the counterparty performed its obligations under the contract and are carried at amortised cost.

Dividends. Dividends are recorded in equity in the period in which they are declared. Dividends declared after the balance sheet date and before the financial statements are authorised for issue are disclosed in the subsequent events note. The statutory accounting reports of the Bank are the basis for profit distribution and other appropriations. Russian legislation identifies the basis of distribution as the current year net profit.

Income and expense recognition. Interest income and

expense are recorded in the consolidated income statement for all debt instruments on an accrual basis using the effective interest method. This method defers, as part of interest income or expense, all fees paid or received between the parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Fees integral to the effective interest rate include origination fees received or paid by the entity relating to the creation or acquisition of a financial asset or issuance of a financial liability, for example fees for evaluating creditworthiness, evaluating and recording guarantees or collateral, negotiating the terms of the instrument and for processing transaction documents.

Commitment fees received by the Group to originate loans at market interest rates are integral to the effective interest rate if it is probable that the Group will enter into a specific lending arrangement and does not expect to sell the resulting loan shortly after origination. The Group does not designate loan commitments as financial liabilities at fair value through profit or loss.

When loans and other debt instruments become doubtful of collection, they are written down to present value of expected cash inflows and interest income is thereafter recorded for the unwinding of the present value discount based on the asset's effective interest rate which was used to measure the impairment loss.

All other fees, commissions and other income and expense items are generally recorded on an accrual basis by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be provided.

Agency fees are recognised as earned based on the applicable service contracts. Income received from the Ministry of Agriculture and expenses incurred related to the Bank's participation in the national project «Development of Agro-Industrial Sector» are recognised by reference to the stage of completion of the services.

Foreign currency translation. Functional currency of each of the Group's consolidated entities is the currency of the primary economic environment in which the entity operates. The consolidated companies' functional currency and the Group's presentation currency is the national currency of the Russian Federation, Russian Roubles («RR»).

Monetary assets and liabilities are translated into each entity's functional currency at the official exchange rate of the CBRF at the respective balance sheet dates. Foreign exchange gains and losses resulting from the settlement

of the transactions and from the translation of monetary assets and liabilities into each entity's functional currency at year-end official exchange rates of the CBRF are recognised in foreign exchange translation gains less losses in the consolidated statement of income. Translation at year-end rates does not apply to non-monetary items, including equity investments. Effects of exchange rate changes on the fair value of equity securities are recorded as part of the fair value gain or loss.

As at 31 December 2006 the principal rate of exchange used for translating foreign currency balances was USD 1 = RR 26.3311 (2005: USD 1 = RR 28.7825).

Fiduciary assets. Assets and liabilities held by the Group in its own name, but on the account of third parties, are not reported on the consolidated balance sheet. The extent of such balances and transactions is indicated in Note 27. For the purposes of disclosure, fiduciary activities do not encompass safe custody functions. Commissions received from fiduciary activities are shown in fee and commission income.

Offsetting. Financial assets and liabilities are offset and the net amount reported in the consolidated balance sheet only when there is a legally enforceable right to offset the recognised amounts, and there is an intention to either settle on a net basis, or to realise the asset and settle the liability simultaneously.

Accounting for the effects of hyperinflation. The Russian Federation has previously experienced relatively high levels of inflation and was considered to be hyperinflationary as defined by IAS 29 «Financial Reporting in Hyperinflationary Economies» («IAS 29»). IAS 29 requires that the financial statements prepared in the currency of a hyperinflationary economy be stated in terms of the measuring unit current at the balance sheet date. IAS 29 indicates that reporting operating results and financial position in the local currency without restatement is not useful because money loses purchasing power at such a rate that the comparison of amounts from transactions and other events that have occurred at different times, even within the same accounting period, is misleading. The characteristics of the economic environment of the Russian Federation indicated that hyperinflation had

ceased effective from 1 January 2003. Restatement procedures of IAS 29 are therefore only applied to assets acquired or revalued and liabilities incurred or assumed prior to that date. For these balances, the amounts expressed in the measuring unit current at as 31 December 2002 are the basis for the carrying amounts in these consolidated financial statements. The restatement was calculated using the conversion factors derived from the Russian Federation Consumer Price Index («CPI»), published by the Russian Statistics Agency, and from indices obtained from other sources for years prior to 1992.

Staff costs and related contributions. Wages, salaries, contributions to the Russian Federation state pension and social insurance funds, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services are rendered by the employees of the Group. The Group makes payments to a non-state pension fund in respect of certain groups of employees (a defined contribution plan). These payments are included in the staff costs in the consolidated income statement.

Segment reporting. A segment is a distinguishable component of the Group that is engaged either in providing products or services (business segment) or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. Segments with a majority of revenue earned from sales to external customers and whose revenue, result or assets are ten percent or more of all the segments are reported separately. Geographical segments of the Group have been reported separately within these consolidated financial statements based on the ultimate domicile of the counterparty, e.g. based on economic risk rather than legal risk of the counterparty.

Changes in accounting policies and presentation. Where necessary, corresponding figures have been adjusted to conform with changes in accounting policies and in the presentation of the current year amounts. Below are the explanations of major reclassifications made.

The effect of reclassifications on the consolidated balance sheet is as follows:

In thousands of Russian Roubles	2005
Increase in	
Current income tax prepayment	75 522
Promissory notes issued	14 109 477
Other borrowed funds	2 693 535
Current income tax liability	2 224
Decrease in	
Other assets	75 522
Debt securities in issue	16 803 012
Other liabilities	2 224

The effect of reclassifications on the consolidated income statement is as follows:

In thousands of Russian Roubles	2005
Increase in	
Interest income	16 236
Gains less losses on trading in foreign currencies	152
Gain from early retirement of debt	7 595
Decrease in	
Losses, net of gains from currency derivatives	152
Other operating income	23 831

Any further changes to these financial statements require approval of the Group's Management Board who authorised these consolidated financial statements for issue.

Critical Accounting Estimates, and Judgements in Applying Accounting Policies

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Judgements that have the most significant effect on the amounts recognised in the financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Impairment losses on loans and advances. The Group regularly reviews its loan portfolios to assess impairment. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the financial position of borrowers (assessed based on internal rating system), or an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on as-

sets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience. To the extent that the assessed probability of default within pools of the total loans and advances to customers differs by +/- one percent, the provision would be approximately RR 35 056 thousand higher or RR 2 248 thousand lower. To the extent that the assessed loss identification period for 3% of not impaired loans differs by +/- 1 month, the provision would be approximately RR 71 837 thousand higher or RR 70 999 thousand lower.

Tax legislation. Russian tax, currency and customs legislation is subject to varying interpretations. Refer to Note 27.

Fair value of derivatives. The fair values of financial derivatives that are not quoted in active markets are determined by using valuation techniques (for example, models). To the extent practical, models use only observable data, however areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect reported fair values.

In the absence of direct and clear evidence on difference between contractual prices on derivatives and observable market prices for similar instruments on the most favourable open market accessible for the Group the fair value of derivatives at the date of initial recognition is considered to be the amount of net investment (or nil in case of no initial net investment). For currency swaps in which the Group agreed to pay roubles and receive dollars (Note 28), this is achieved by shifting rouble yield curve used to discount future cashflows in order to reflect the Group's credit risk. This credit spread is subsequently adjusted only if there are observable market data about the Group's credit spread for similar contracts. To the extent that the shift of rouble yield curve used to discount future cashflows in order to reflect the Group's credit risk is averaged for deals in one currency and within one period, the fair value of currency swaps would be approximately RR 2 125 thousand higher.

Deferred income tax asset recognition. The recognised deferred tax asset represents income taxes recoverable through future deductions from taxable profits and is recorded on the balance sheet. Deferred income tax assets

are recorded to the extent that realisation of the related tax benefit is probable. The future taxable profits and the amount of tax benefits that are probable in the future are based on medium term business plan prepared by management and extrapolated results thereafter. The business plan is based on management expectations that are believed to be reasonable under the circumstances.

Related party transactions. The Bank's only shareholder is the Government of the Russian Federation represented by the Federal Agency for Managing State Property (See Note 1). Currently the Government of the Russian Federation does not provide to the general public or entities under its ownership/control a complete list of the entities which are owned or controlled directly or indirectly by the State. Judgement is applied by the Management in identification of related parties to be disclosed in the consolidated financial statements. Refer to Note 31.

Adoption of New or Revised Standards and Interpretations

Certain new IFRSs became effective for the Group from 1 January 2006. Listed below are those new or amended standards or interpretations which are or in the future could be relevant to the Group's operations and the nature of their impact on the Group's accounting policies. All changes in accounting policies were applied retrospectively with adjustments made to the retained earnings at 1 January 2005, unless otherwise described below.

IFRIC 4, Determining whether an Arrangement contains a Lease (effective from 1 January 2006). IFRIC 4 requires that determining whether an arrangement is, or contains, a lease be based on the substance of the arrangement. It requires an assessment of whether (a) fulfilment of the arrangement is dependent on the use of a specific asset or assets (the asset); and (b) the arrangement conveys a right to use the asset. The Group reassessed its arrangements and concluded that no adjustments are required as a result of adoption of IFRIC 4.

IAS 39 (Amendment) – The Fair Value Option (effective from 1 January 2006). IAS 39 (as revised in 2003) permitted entities to designate irrevocably on initial recognition practically any financial instrument as one to be measured at fair value with gains and losses recognised

in profit or loss ('fair value through profit or loss'). The amendment changes the definition of financial instruments 'at fair value through profit or loss' and restricts the ability to designate financial instruments as part of this category. The Group amended its policies and management now designates financial instruments as part of this category only if (a) such classification eliminates or significantly reduces an accounting mismatch that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases; or (b) a group of financial assets, financial liabilities or both is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information on that basis is regularly provided to and reviewed by the Bank's Management Board.

The Group applies the amendment retrospectively in accordance with the transitional provisions of the Fair Value Option amendment to IAS 39. The amendment did not have an impact on these financial statements.

IAS 39 (Amendment) – Cash Flow Hedge Accounting of Forecast Intragroup Transactions (effective from 1 January 2006). The amendment allows the foreign currency risk of a highly probable forecast intragroup transaction to qualify as a hedged item in the consolidated financial statements provided that the transaction is denominated in a currency other than the functional currency of the entity entering into that transaction and the foreign currency risk will affect consolidated profit or loss. The Group does not apply hedge accounting and therefore the amendment did not have an impact on these financial statements.

IAS 39 (Amendment) – Financial Guarantee Contracts (effective from 1 January 2006). As a result of this amendment, the Group measures issued financial guarantees initially at their fair value, which is normally evidenced by the amount of fees received. This amount is then amortised on a straight line basis over the life of the guarantee. At each balance sheet date, the guarantees are measured at the higher of (i) the unamortised balance of the amount at initial recognition and (ii) the best estimate of expenditure required to settle the commitment at the balance sheet date. This amendment did not have a significant impact on these financial statements.

IAS 21 (Amendment) – Net Investment in a Foreign Operation (effective from 1 January 2006). This amendment requires foreign exchange gains and losses on monetary items that form part of net investment in a foreign operation (e.g. quasi-equity intercompany loans) to be reported

in consolidated equity even if the loans are not in the functional currency of either the lender or the borrower. Previously, such exchange differences were required to be recognised in consolidated profit or loss. It also extended the definition of 'net investment in a foreign operation' to include loans between sister companies. This amendment did not have a significant impact on these financial statements.

IAS 19 (Amendment) – Employee Benefits (effective from 1 January 2006). The amendment introduced an additional option to recognise actuarial gains and losses arising in post-employment defined benefit plans in full directly in retained earnings in equity. It also requires new disclosures about defined benefit plans and clarifies accounting for a contractual agreement between a multi-employer plan and participating employers. This amendment did not have a significant impact on these financial statements.

Effect of Adoption of New or Revised Standards. The effect of adoption of the above new or revised standards and interpretations on the Group's financial position at 31 December 2006 and 31 December 2005 and on the results of its operations for the years then ended was not significant.

New Accounting Pronouncements

Certain new standards and interpretations have been published that are mandatory for the Group's accounting periods beginning on or after 1 January 2007 or later periods and which the Bank has not early adopted:

IFRS 7 Financial Instruments: Disclosures and a complementary Amendment to IAS 1 Presentation of Financial Statements – Capital Disclosures (effective from 1 January 2007). The IFRS introduces new disclosures to improve the information about financial instruments. The volume of disclosures will increase significantly with an emphasis on quantitative aspects of risk exposures and the methods of risk management. The quantitative disclosures will provide information about the extent of exposure to risk, based on information provided internally to the entity's key management personnel. Qualitative and quantitative disclosures will cover exposure to credit risk, liquidity risk and market risk including sensitivity analysis to market risk. IFRS 7 replaces IAS 30, Disclosures in the Financial Statements of Banks and Similar Financial Institutions, and some of the requirements in IAS 32,

Financial Instruments: Disclosure and Presentation. The Amendment to IAS 1 introduces disclosures about level of an entity's capital and how it manages capital. The Group is currently assessing what impact the new IFRS and the amendment to IAS 1 will have on disclosures in its financial statements.

IFRS 8, Operating Segments (effective for annual periods beginning on or after 1 January 2009). This Standard applies to entities the debt instrument of which are

traded in the open market, and entities which provide, or plan to provide, their financial statements to supervisory bodies in connection with placement of certain instruments in the open market. IFRS 8 requires to disclose financial and narrative information in respect of operating segments and clarifies how to disclose it in the financial statements. Currently, the management evaluates the effect of this Standard on disclosing information on segments in the Group's consolidated financial statements.

Other new standards or interpretations. The Group has not early adopted the following other new standards or interpretations:

- IAS 23 (Revised), Borrowing costs (effective for borrowing costs relating to qualifying assets for which the commencement date for capitalisation is on or after 1 January 2009);
- IFRIC 7, Applying the Restatement Approach under IAS 29 (effective for periods beginning on or after 1 March 2006, that is from 1 January 2007);
- IFRIC 8, Scope of IFRS 2 (effective for periods beginning on or after 1 May 2006, that is from 1 January 2007);
- IFRIC 9, Reassessment of Embedded Derivatives (effective for annual periods beginning on or after 1 June 2006);
- IFRIC 10, Interim Financial Reporting and Impairment (effective for annual periods beginning on or after 1 November 2006);
- IFRIC 11, IFRS 2—Group and Treasury Share Transactions (effective for annual periods beginning on or after 1 March 2007);
- IFRIC 12, Service Concession Arrangements (effective for annual periods beginning on or after 1 March 2008).

Unless otherwise described above, the new standards and interpretations are not expected to significantly affect the Group's financial statements.

Cash and Cash Equivalents

In thousands of Russian Roubles	2006	2005
Cash on hand	1 249 651	639 297
Cash balances with the CBRF (other than mandatory reserve deposits)	11 663 404	2 689 306
Correspondent accounts and overnight placements with other banks		
— the Russian Federation	341 529	11 534
— The United States of America	43 705	1 433 531
— Other countries	15 301	12 400
— Settlement accounts with MICEX and RTS	2 189	6 620
Total cash and cash equivalents	13 315 779	4 792 688

Geographical, currency and interest rate analyses of cash and cash equivalents are disclosed in Note 26. The information on related party balances is disclosed in Note 31.

Trading Securities and Repurchase Receivable

In thousands of Russian Roubles	2006	2005
Promissory notes	2 447 538	1 831 885
Corporate bonds	1 670 004	796 704
Federal loan bonds (OFZ bonds)	1 069 928	828 851
Municipal bonds	765 238	493 251
Corporate Eurobonds	692 358	562 646
Corporate shares	88 158	9 715
Total trading securities	6 733 224	4 523 052
Repurchase receivable	152 573	—

As at 31 December 2006 promissory notes in the Group's portfolio are represented by promissory notes issued by Russian banks. These promissory notes have maturities from January to December 2007 (2005: from demand to October 2006). As at 31 December 2006 yield to maturity ranges from 8.7% p.a. to 17.3% p.a. (2005: from 8.5% p.a. to 20.0% p.a.).

Corporate bonds are securities denominated in Russian Roubles issued by major Russian companies. Corporate bonds are traded at a discount or premium to face value and carry a coupon payable quarterly or semi-annually, depending on the type of the bond issue and the issuer. These bonds have maturity dates from January 2007 to February 2016 (2005: from April 2006 to June 2010), coupon rate from 7.1% to 10.7% (2005: from 7.2% to 14.2%) and yield to maturity from 6.6% to 11.1% (2005: from 6.6% to 14.0%), depending on the type of the bond issue, the issuer and the market conditions.

OFZ bonds are Russian Rouble denominated government securities issued by the Ministry of Finance of the Russian Federation. OFZ bonds have maturity dates from July 2010 to August 2018 (2005: from July 2010 to August 2018), coupon rate from 8.5% to 10% p.a. (2005: 10% p.a.) and yield to maturity from 6.8% p.a. to 7.6% p.a. as at 31 December 2006 (2005: from 7.5% to 7.6% p.a.), depending on the type of the bond issue and the market conditions.

Municipal bonds are represented by bonds issued by Russian municipal authorities. These bonds are traded at a discount or premium to face value and carry a coupon payable quarterly or semi-annually, depending on the type of the bond issue and the issuer. These bonds

have maturity dates from November 2007 to June 2015 (2005: from July 2006 to November 2013), coupon rate from 6.8% to 13.3% p.a. (2005: from 6.8% to 14.0% p.a.) and yield to maturity from 6.0% to 9.0% as at 31 December 2006 (2005: from 6.0% to 13.5% p.a.), depending on the type of the bond issue, the issuer and the market conditions.

Corporate Eurobonds are interest bearing securities denominated in USD, issued by major Russian companies, and are freely tradable internationally. These bonds have maturity dates from June 2007 to October 2016 (2005: from October 2006 to September 2015), coupon rate from 7.5% to 9.8% p.a. (2005: from 6.2% to 10.9% p.a.) and yield to maturity from 5.4% to 9.6% p.a. as at 31 December 2006 (2005: from 6.0% to 8.2% p.a.), depending on the type of the bond issue, the issuer and the market conditions.

Corporate shares are shares of Russian companies.

Trading securities are tradable on Russian Stock Exchanges (RTS or MICEX), internationally or in an over-the-counter market depending on the type of security. The Bank is licensed by the Federal Commission on Securities Markets for trading in securities.

Repurchase receivable represents corporate bonds sold under sale and repurchase agreements which the counterparty has the right, by contract or custom, to sell or repledge. At 31 December 2006 the aggregate estimated fair value of repurchase receivable was RR 152 573 thousand (2005: none). Refer to Note 27.

Geographical, currency and interest rate analyses of trading securities and repurchase receivable are disclosed in Note 26. The information on trading securities issued by related parties is disclosed in Note 31.

Due from Other Banks

In thousands of Russian Roubles	2006	2005
Current term placements with other banks	2 964 740	1 435 563
Reverse sale and repurchase agreements	199 801	—
Total due from other banks	3 164 541	1 435 563

Movements in the provision for impairment of due from other banks are as follows:

In thousands of Russian Roubles	2006	2005
Provision for impairment of due from other banks at 1 January	—	58 080
Recovery of provision for impairment of due from other banks during the year	—	(58 080)
Provision for impairment of due from other banks as at 31 December	—	—

As at 31 December 2006 the estimated fair value of due from other banks was RR 3 164 541 thousand (2005: RR 1 435 563 thousand). Refer to Note 29.

As at 31 December 2006 the Group has placements with two Russian banks with aggregated balances of RR 1 853 779 thousand, or 58% of total due from other banks

(2005: two banks with aggregated amount of RR 1 277 091 thousand, or 89% of total due from other banks), which mature from January to April 2007.

Geographical, currency, maturity and interest rate analyses of due to other banks are disclosed in Note 26. The information on related party balances is disclosed in Note 31.

Loans and Advances to Customers

In thousands of Russian Roubles	2006	2005
Current loans	157 524 986	44 975 413
Overdue loans	1 203 452	632 289
Reverse sale and repurchase agreements	797 386	—
Investments in agricultural cooperatives	396 935	—
Total loans and advances to customers (before impairment)	159 922 759	45 607 702
Less: Provision for loan impairment	(4 057 516)	(1 447 995)
Total loans and advances to customers	155 865 243	44 159 707

Overdue loans represent the amount of overdue loan payments and do not include the entire outstanding balance of the loans with overdue payments.

Investments in agricultural cooperatives represent contributions made by the Bank as part of its participation in the National Project «Development of the Agro-Industrial

Sector». According to the contracts with cooperatives the Bank receives fixed annual dividends at the rate of 6% of contributions made. According to the Bank's approved program, it makes cooperative member contributions for the period of 5 to 8 years, at the end of which the Bank will withdraw its contributions.

Movements in the provision for loan impairment are as follows:

In thousands of Russian Roubles	2006	2005
Provision for loan impairment at 1 January	1 447 995	609 266
Provision for loan impairment during the year	2 631 382	848 200
Loans and advances to customers written off during the year as uncollectible	(21 861)	(9 471)
Provision for loan impairment at 31 December	4 057 516	1 447 995

Economic sector risk concentrations within the customer loan portfolio are as follows:

In thousands of Russian Roubles	2006		2005

As at 31 December 2006, the Group had three customers with balances above RR 2 200 000 thousand (2005: two customers with balances above RR 1 100 000 thousand). The aggregate balance of these customers was RR 8 259 047 thousand, or 24% of total customer accounts (2005: RR 2 548 884 thousand, or 17% of total customer accounts).

As at 31 December 2006, the estimated fair value of customer accounts was RR 34 462 791 thousand (2005: RR 14 676 969 thousand). Refer to Note 29.

Geographical, currency, maturity and interest rate analyses of customer accounts are disclosed in Note 26. The information on related party balances is disclosed in Note 31.

Promissory Notes Issued

In thousands of Russian Roubles	2006	2005
Promissory notes issued	38 235 757	14 109 477
Total promissory notes issued	38 235 757	14 109 477

The Group issued promissory notes at a discount to nominal value and interest bearing promissory notes denominated in Russian Roubles, US dollars and Euros with effective interest rate from 0% p.a. (for promissory notes on demand) to 9% p.a. and maturity dates from January 2007 to November 2011 (2005: Russian Roubles and US dollars with effective interest rate from 0% p.a. (for promissory notes on demand) to 11% p.a. and maturity dates from January 2006 to November 2011). As at 31 December 2006 promissory notes issued, which

were initially purchased by four banks, amounted RR 36 020 979 thousand or 94% of total promissory notes issued by the Group (2005: two banks purchased promissory notes of RR 13 142 437 thousand or 93%). As at 31 December 2006 the estimated fair value of Promissory notes issued was RR 38 235 757 thousand (2005: RR 14 109 477 thousand). Refer to Note 29. Geographical, currency, maturity and interest rate analyses of Promissory notes issued are disclosed in Note 26.

Subordinated Debt

As at 31 December 2006, subordinated debt represents USD 500 000 thousand Eurobonds issued by the Group in September 2006 through its special purpose entity, RHSB Capital S.A. The Eurobonds mature in September 2016 and have semi-annual interest payments at 6.97% p.a. and yield to the next repricing date in September 2011 of 6.16% p.a.

As at 31 December 2005, subordinated debt represents funds obtained by the Group in 2001 from Agency for Restructuring of Credit Organisations («ARCO», Russian government financial institution) for the purpose of financing the main activity of the Group. Due to ARCO

liquidation in December 2004, its rights and obligation were assigned to Government corporation «Agency for Deposit Insurance». Interest rates on these funds amount to 3.25% p.a., maturity period is from April to June 2006. The Group repaid the debt in June 2006.

As at 31 December 2006, the fair value of subordinated debt was RR 13 845 781 thousand (2005: RR 165 155 thousand). Refer to Note 29.

Geographical, currency, maturity and interest rate analyses of subordinated debt are disclosed in Note 26. The information on related party balances is disclosed in Note 31.

Other Borrowed Funds

In thousands of Russian Roubles	2006	2005
Eurobonds issued	27 682 740	7 147 944
Domestic bonds issued	10 017 849	2 693 535
Total other borrowed funds	37 700 589	9 841 479

As at 31 December 2006, the Group had borrowings of RR 27 682 740 thousand (2005: RR 7 147 944 thousand) in US Dollars denominated Eurobonds issued through its special purpose entity, RHSB Capital S.A.

Eurobonds with nominal value of USD 350 000 thousand (2005: USD 250 000 thousand) have maturity on 29 November 2010 and semi-annual payment of coupon income. As at 31 December 2006, coupon income was 6.875% p.a. and yield to maturity 6.0% p.a. (2005: 6.9% p.a.).

Eurobonds with nominal value of USD 700 000 thousand (2005: nil) have maturity on 16 May 2013 and semi-annual payment of coupon income. As at 31 December 2006, coupon income was 7.175% p.a. and yield to maturity 6.09% p.a.

In December 2004, the Group placed own bonds denominated in Russian Roubles in the amount of RR 3 000 000 thousand maturing in June 2008 with the quarterly payment of coupon income. As at 31 December 2006, cou-

pon rate is 7.2% p.a. (as at 31 December 2005: 7.5% p.a.) and yield to maturity is 7.01% p.a. (2005: 7.53% p.a.). In February 2006, the Group placed own bonds denominated in Russian Roubles in the amount of RR 7 000 000 thousand maturing in February 2011 with the quarterly payment of coupon income. As at 31 December 2006, coupon rate is 7.85% p.a. and yield to maturity is 7.31% p.a.

As at 31 December 2006, the estimated fair value of other borrowed funds was RR 39 392 756 thousand (2005: RR 9 841 479 thousand). Refer to Note 29.

Geographical, currency, maturity and interest rate analyses of other borrowed funds are disclosed in Note 26.

Expenses relating to participation in the national project represent expenses incurred by the Group relating to information and marketing support of the national project «Development of Agro-Industrial Sector» and mainly include advertising and marketing. The Group received income in the amount of RR 127 118 thousand from the Ministry of Agriculture of the Russian Federation under the state contract concluded with the Ministry of

Agriculture included in the consolidated income statement in connection with the above project. Included in staff costs are statutory social security and pension contributions of RR 523 394 thousand (2005: RR 237 166 thousand), and also contributions to a non-state pension fund in the amount of RR 35 909 thousand (2005: RR 16 182 thousand).

Income Taxes

Income tax expense comprises the following:

In thousands of Russian Roubles	2006	2005
Current tax	400 589	106 465
Deferred tax	(77 680)	(50 899)
Income tax expense for the year	322 909	55 566

The income tax rate applicable to the majority of the Group's income is 24% (2005: 24%). A reconciliation between the expected and the actual taxation charge is provided below:

In thousands of Russian Roubles	2006	2005
IFRS profit before taxation	1 176 086	145 714
Theoretical tax charge at statutory rate (2006: 24%; 2005: 24%)	282 261	34 971
Tax effect of items which are not deductible or assessable for taxation purposes:		
– Income which is exempt from taxation	409	(3 581)
– Non deductible staff costs	22 211	7 759
– Non deductible charity costs	9 005	3 586
– Other non deductible expenses	21 791	24 210
– Income on government securities taxed at different rates	(12 768)	(11 379)
Income tax expense for the year	322 909	55 566

The Group has not recorded a deferred tax liability in respect of temporary differences of RR 7 272 thousand (2005: RR 1 811 thousand) associated with investments in the subsidiary as the Group is able to control the timing of the reversal of those temporary differences and does not intend to reverse them in the foreseeable future. Differences between IFRS and Russian statutory taxation regulations give rise to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their tax bases. The tax effect of the movements in these temporary differences is detailed

below and is recorded at the rate of 24% (2005: 24%), except for income on state securities that is taxed at 15% (2005: 15%).

In the context of the Group's current structure and Russian tax legislation, tax losses and current tax assets of different group companies may not be offset against current tax liabilities and taxable profits of other group companies and, accordingly, taxes may accrue even where there is a consolidated tax loss. Therefore, deferred tax assets and liabilities are offset only when they relate to the same taxable entity and the same taxation authority.

Segment Analysis

The Group's primary format for reporting segment information is business segments and the secondary format is geographical segments.

Business Segments. The Group is organised on the basis of two main business segments:

- Retail banking – representing private banking services, private customer current accounts, savings, deposits, investment savings products, custody, credit and debit cards, consumer loans and mortgages.
- Corporate banking – representing direct debit facilities, current accounts, deposits, overdrafts, loan and other credit facilities, foreign currency and derivative products.

Segment information for the main reportable business segments of the Group for the year ended 31 December 2006 is set out below:

In thousands of Russian Roubles	Corporate banking	Retail banking	Unallocated funds	Total

The Group changed its accounting policy for segment revenues to exclude gains (net of losses) from segment revenues. The change was applied retrospectively from 1 January 2005. Management believes that the revised definition of segment revenue better reflects objectives of reporting segment information.

The effect of the change was to reduce 2005 segment revenues in the corporate banking segment by RR 83 538 thousand, in the retail banking segment by RR 10 838 thousand.

Segment information for the main reportable business segments of the Group for the year ended 31 December 2005 is set out below:

In thousands of Russian Roubles	Corporate banking	Retail banking	Unallocated funds	Total

Geographical segments. The Group operates only in the Russian Federation. Substantially all revenues of the Group were received from contracting parties operating in the Russian Federation.

Financial Risk Management

The risk management function within the Group is carried out in respect of financial risks (credit, market, geographical, currency, liquidity and interest rate), operational risks and legal risks. The primary objectives of the financial risk management function are to establish risk limits, and then ensure that exposure to risks stays within these limits. The operational and legal risk management functions are intended to ensure proper functioning of internal policies and procedures to minimise operational and legal risks.

Credit risk. The Group takes on exposure to credit risk which is the risk that a counterparty will be unable to pay all amounts in full when due. The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review. Limits on the level of credit risk by product and borrower are approved regularly by the Bank's Management Board and Credit Committee.

Most of the Group's exposure to credit risk is concentrated in agricultural industry (refer to Notes 1 and 10). However, the credit risk on agricultural industry is diversified through wide spread of borrowers across Russian regions and through different types of agricultural borrowers.

The exposure to any one borrower including banks and brokers is further restricted by sub-limits covering on and off-balance sheet exposures and daily delivery risk limits in relation to trading items such as forward foreign

exchange contracts. Actual exposures against limits are monitored daily.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and principal repayment obligations and by changing these lending limits where appropriate. Exposure to credit risk is also managed, in part, by obtaining collateral and corporate and personal guarantees.

The Group's maximum exposure to credit risk is primarily reflected in the carrying amounts of financial assets on the consolidated balance sheet. The impact of possible netting of assets and liabilities to reduce potential credit exposure is not significant.

Credit risk for off-balance sheet financial instruments is defined as the possibility of sustaining a loss as a result of another party to a financial instrument failing to perform in accordance with the terms of the contract. The Group uses the same credit policies in making conditional obligations as it does for onbalance sheet financial instruments through established credit approvals, risk control limits and monitoring procedures.

Market risk. The Group takes on exposure to market risks. Market risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements. The Management Board sets limits on the value of risk that may be accepted, which is monitored on a regular basis. However, the use of this approach does not prevent losses outside of these limits in the event of more significant market movements.

Geographical risk. The geographical concentration of the Group's assets and liabilities as at 31 December 2006 is set out below:

Currency risk. The Group takes on exposure to effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Bank's management sets limits on the level of exposure

by currency and in total for both overnight and intra-day positions, which are monitored daily. The table below summarises the Group's exposure to foreign currency exchange rate risk at 31 December 2006:

In thousands of Russian Roubles	RR	US Dollars	Euro	Other	Non—monetary	Total

Other borrowed funds	2 693 535	7 147 944	—	—	—	9 841 479
Current income tax liabilities	2 224	—	—	—	—	2 224
Other liabilities	515 432	839	—	—	—	516 271
Subordinated debt	165 155	—	—	—	—	165 155
Total liabilities	35 805 754	9 942 118	255 344	—	—	46 003 216
Fair value of currency derivatives	(7 400)	2 673	—	—	—	(4 727)
Net balance sheet position, excluding currency derivatives	17 342 688	(7 705 924)	7 316	1 458	1 390 891	11 036 429
Currency derivatives	(6 949 245)	6 944 518	—	—	—	(4 727)
Net currency position	10 393 443	(761 406)	7 316	1 458	1 390 891	11 031 702

The currency derivatives position in each column represents the fair value, at the balance sheet date, of the respective currency that the Group decided to buy (positive amount) or sell (negative amount). The amounts by currency are presented gross as stated in Note 28. The net total represents fair value of the derivatives.

The Group has extended loans and advances denominated in foreign currencies. Movements in foreign exchange rates affect the borrowers' repayment ability and incurrence of loan losses.

Liquidity risk. Liquidity risk is defined as the risk when the maturity of assets and liabilities does not match. The Group is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits, loan draw downs, guarantees and from margin and other calls on cash settled derivative instruments. The Group does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty. Liquidity risk is managed by the Treasury of the Group.

The table below shows assets and liabilities as at 31 December 2006 by their remaining contractual maturity. Some of the assets and liabilities, however, may be of a longer term nature; for example, loans are frequently renewed and accordingly short term loans can have a longer term duration. Overdue liabilities, such as term deposits not withdrawn by the Bank's customers, are classified within

the «demand and less than 1 month» column. Overdue assets are classified within the «demand and less than 1 month» column. Certain assets that do not have contractual maturity dates are assumed to mature on the expected date on which the assets will be realised. The liquidity position of the Group as at 31 December 2006 is set out below:

In thousands of Russian Roubles	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 1 to 5 years	Over 5 years/ No stated maturity	Total

The entire portfolio of trading securities is classified within demand and less than one month based on management's assessment of portfolio's realisability and their view that it is a fairer portrayal of the Bank's liquidity position. The allocation of the portfolio of trading securities according to the contractual maturities is the following:

Demand and less than 1 month — RR 65 463 thousand; From 1 to 6 months — RR 147 020 thousand; From 6 to 12 months — RR 2 418 176 thousand; From 1 to 5 years — RR 2 273 878 thousand; Over 5 years — RR 1 740 529 thousand; No stated maturity — RR 88 158 thousand.

The liquidity position of the Group at 31 December 2005 is set out below:

In thousands of Russian Roubles	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	From 1 to 5 years	Over 5 years/ No stated maturity	Total

The allocation of the portfolio of trading securities according to the contractual maturities is the following: Demand and less than 1 month – RR 51 765 thousand; From 1 to 6 months – RR 1 247 947 thousand; From 6 to 12 months – RR 676 865 thousand; From 1 to 5 years – RR 1 945 681 thousand; Over 5 years – RR 591 079; No stated maturity – RR 9 715 thousand.

The matching and/or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the management of the Group. It is unusual for banks ever to be completely matched since business transacted is often of an uncertain term and of different types. An unmatched position potentially

enhances profitability, but can also increase the risk of losses. The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest and exchange rates.

Management believes that in spite of a substantial portion of customers accounts being on demand, diversification of these deposits by number and type of depositors, and the past experience of the Group would indicate that these customers accounts provide a long-term and stable source of funding for the Group.

Customer accounts are classified in the above analysis based on contractual maturities. However, in accordance with the Russian Civil Code, individuals have a right to withdraw their deposits prior to maturity if they forfeit their right to accrued interest.

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Group does not generally expect the third party to draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit does not necessarily represent future cash requirements, since many

of these commitments will expire or terminate without being funded.

Interest rate risk. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The table below summarises the Group's exposure to interest rate risks at 31 December 2006. Included in the table are the Bank's assets and liabilities at carrying amounts, categorised by the earlier of contractual repricing or maturity dates.

In thousands of Russian Roubles	Demand and less than 1 month	From 1 to 6 months	From 6 to 12 months	More than 1 year	Non-monetary	Total

The Group is exposed to cash flow interest rate risk, principally through mismatching of assets and liabilities with fixed interest rates, and also through mismatching of assets and liabilities with floating interest rates for which interest rates are reset as market rates change. Such assets and liabilities are primarily presented in the above table as being repriced in the short-term. The Group is exposed to fair value interest rate risk as a result of assets and liabilities at fixed interest rates; these are primarily presented in the above table as being repriced in the long-term. In practice, interest rates that are contractually fixed on

both assets and liabilities are usually renegotiated to reflect current market conditions.

The Bank's Management Board monitors the level of interest risk by analysing mismatch of interest rate repricing for assets and liabilities on a regular basis. In the absence of any available hedging instruments, the Group normally seeks to match its interest rate positions.

The table below summarises the effective interest rates by major currencies for major debt instruments. The analysis has been prepared based on year-end effective rates used for amortisation of the respective assets/liabilities.

In % p.a.	2006				2005			
	RR	USD	Euro	Other	RR	USD	Euro	Other

The sign “—” in the table above means that the Group does not have the respective assets or liabilities in corresponding currency.

Contingencies and Commitments

Legal proceedings. From time to time and in the normal course of business, claims against the Group are received. On the basis of its own estimates and both internal and external professional advice the Group’s management is of the opinion that no material losses will be incurred in respect of claims and accordingly no provision has been made in these consolidated financial statements.

Tax legislation. Russian tax, currency and customs legislation is subject to varying interpretations, and changes, which can occur frequently. Management’s interpretation of such legislation as applied to the transactions and activity of the Group may be challenged by the relevant regional and federal authorities. Recent events within the Russian Federation suggest that the tax authorities may be taking a more assertive position in their interpretation of the legislation and assessments, and it is possible that transactions and activities that have not been challenged in the past may be challenged. As a result, significant additional taxes, penalties and interest may be assessed. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar

years preceding the year of review. Under certain circumstances reviews may cover longer periods.

Russian transfer pricing legislation introduced 1 January 1999 provides the possibility for tax authorities to make transfer pricing adjustments and impose additional tax liabilities in respect of all controllable transactions, provided that the transaction price differs from the market price by more than 20%.

Controllable transactions include transactions with interdependent parties, as determined under the Russian Tax Code, all cross-border transactions (irrespective whether performed between related or unrelated parties), transactions where the price applied by a taxpayer differs by more than 20% from the price applied in similar transactions by the same taxpayer within a short period of time, and barter transactions. There is no formal guidance as to how these rules should be applied in practice. In the past, the arbitration court practice with this respect has been contradictory.

The Management believes that its interpretation of the relevant legislation is appropriate and the Group’s tax,

currency legislation and customs positions will be sustained. Accordingly, at 31 December 2006 no provision for potential tax liabilities had been recorded (2005: no provision).

However, a possible tax risk has been identified in relation to the transactions to assign rights on issued loans to other banks and the maximum possible tax exposure is RR 485 711 thousand calculated as 18% VAT of the

amount of loans issued by the Bank and subsequently assigned to other banks during 2006. The Tax Code does not provide clear guidance on VAT on assigning of loans (where the underlying assets, loans to customers, are not subject to VAT), therefore management believes that, based on relevant legislation and existing market practice, no VAT liability will crystallise as a result of these transactions.

Capital expenditure commitments. At 31 December 2006 the Group has contractual capital expenditure commitments totalling RR 363 453 thousand (2005: nil).

Operating lease commitments. Where the Group is the lessee, the future minimum lease payments under non cancellable operating leases for premises and equipment are as follows:

In thousands of Russian Roubles	2006	2005
Not later than 1 year	354 309	171 827
Later than 1 year and not later than 5 years	576 604	213 431
Later than 5 years	358 519	108 483
Total operating lease commitments	1 289 432	493 741

Compliance with covenants. The Group is subject to certain covenants related primarily to its borrowings in respect of maintenance of capital adequacy ratio calculated in accordance with recommendations of Basle Committee on Banking Regulations. Non-compliance with these covenants may result in negative consequences for the Group including growth in the cost of borrowings and declaration of default. The Group's Management believes that the Group is in compliance with the covenants.

Credit related commitments. The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Group on behalf of a customer authorising

a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions, are collateralised by the underlying shipments of goods to which they relate or cash deposits and therefore carry less risk than a direct borrowing.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit related commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

Outstanding credit related commitments are as follows:

In thousands of Russian Roubles	Note	2006	2005
Undrawn credit lines		72 718	246 389
Import letters of credit		1 348 682	87 360
Guarantees issued		19 769	106 393
Less: Provision for credit related commitments	18	—	(801)
Total credit related commitments		1 441 169	439 341

The total outstanding contractual amount of undrawn credit lines, letters of credit, and guarantees does not necessarily represent future cash requirements, as these

financial instruments may expire or terminate without being funded.

Movements in provision for losses on credit related commitments are as follows:

In thousands of Russian Roubles	2006	2005
Provision for losses on credit related commitments as at 1 January	801	13 942
Provision for losses on credit related commitments during the year	—	—
Use of provision for losses on credit related commitments during the period	(801)	(13 141)
Provision for losses on credit related commitments at 31 December	—	801

Credit related commitments are denominated in currencies as follows:

In thousands of Russian Roubles	2006	2005
Russian roubles	285 153	368 462
US Dollars	212 379	—
Euro	943 637	70 879
Total	1 441 169	439 341

Fiduciary assets. These assets are not included in the Group's consolidated balance sheet as they are not the assets of the Group. Nominal values disclosed below are normally different from the fair values of respective securities.

The fiduciary assets fall into the following categories:

In thousands of Russian Roubles	2006 Nominal value	2005 Nominal value
Promissory notes issued by the Bank	626 751	220 443
Promissory notes and securities of Russian companies held in custody of the Bank	331 007	12 113 610
VEB bonds held in custody of the Bank's depository	42 130	—
Corporate shares held on an account with the National Depository Centre	550	—
Client OFZ securities held on an account with MICEX	—	849 087
Municipal bonds held on an account with the National Depository Centre	—	113 000
Corporate bonds held on an account with the National Depository Centre	—	86 943

Assets pledged and restricted. At 31 December 2006 the Group had corporate bonds pledged under sale and repurchase agreements whose fair value was RR 152 573 thousand (2005: none). Refer to Note 8.

In addition, mandatory cash balances with the CBRF in the amount of RR 1 717 423 thousand (2005: RR 484 714 thousand) represent mandatory reserve deposit which is not available to finance the Group's day to day operations.

Derivative Financial Instruments

Foreign exchange derivative financial instruments entered into by the Group are generally traded in an over-the-counter market with professional market counterparties on standardised contractual terms and conditions. Derivatives have potentially favourable (assets) or unfavourable (liabilities) conditions as a result of fluctuations in market interest rates, foreign exchange rates or other variables relative to their terms. The aggregate fair values of derivative financial assets and liabilities can fluctuate significantly from time to time. Risks arising

from derivative financial instruments are managed by the Treasury of the Group through establishing limits on derivative trading.

Foreign currency swap deals are structured as loans made by the Group in US dollars and Euros with three OECD banks with maturity from June 2007 to July 2013 and placements received from the same three banks in Russian Roubles with the same maturities («back to back loans»). These transactions were aimed at hedging the currency exposure of the Group.

The derivative financial instruments were valued as follows:

- Foreign exchange forward contracts have been valued by reference to the forward exchange rates as at 31 December as compared to the balance sheet carrying value of these contracts at 31 December;
- Foreign exchange cross currency swap contracts with maturity more than 30 days traded in an over-the-counter market have been valued based on a model assuming nil fair value at inception of the respective contracts. At present, Russian market for long-term swap contracts is not active, and market participants often have substandard credit ratings. Based on the above considerations, management concluded that standard market yield curves for respective currencies of the swaps should be adjusted to account for the credit risk and other implied factors in initial pricing of the Group as a Russian counterparty.

The Group expects to settle these forward and swap contracts net in cash and therefore recognised them in the balance sheet as an asset at net fair value of RR 170 404

thousand (2005: RR 2 673 thousand) and a liability at net fair value of RR 641 254 thousand (2005: RR 7 400 thousand). Refer to Notes 12 and 18.

The table below reflects gross positions before the netting of any counterparty positions and covers the contracts with settlement dates after the respective balance sheet date:

In thousands of Russian Roubles	Note	Contracts with positive fair value	Contracts with negative fair value	Total
Foreign exchange forward deals under 2 days: fair values, at the balance sheet date, of	3, 26			
USD receivable on settlement (+)			763 602	763 602

Total net fair value	12, 18	2 673	(7 400)	(4 727)

Fair Value of Financial Instruments

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation, and is best evidenced by an active quoted market price. The estimated fair values of financial instruments have been determined by the Group using available market information, where it exists, and appropriate valuation methodologies. However, judgement is necessarily required to interpret market data to determine the estimated fair value. The Russian Federation continues to display some characteristics of an emerging market and economic conditions continue to limit the volume of activity in the financial markets. Market quotations may be outdated or reflect distress sale transactions and therefore not represent fair values of financial instruments. Management has used all available market information in estimating the fair value of financial instruments.

Financial instruments carried at fair value. Trading securities and derivative financial instruments are carried on the consolidated balance sheet at their fair value. Cash and cash equivalents are carried at amortised cost which approximates current fair value. Fair values were determined based on quoted market prices.

Loans and receivables carried at amortised cost. The fair value of floating rate instruments is normally their carrying amount. The estimated fair value of fixed interest

bearing placements is based on discounted cash flows using prevailing current money market interest rates for instruments with similar credit risk and similar maturity. See Notes 9 and 10 for estimated fair value of due from other banks and loans and advances to customers, respectively.

Liabilities carried at amortised cost. The fair value of securities in issue is based on quoted market prices, if available. The estimated fair value of fixed interest rate instruments with stated maturity, for which a quoted market price is not available, was estimated based on expected cash flows discounted at current interest rates for new instruments with similar credit risk and remaining maturity. The fair value of liabilities repayable on demand or after a notice period («demandable liabilities») is estimated as the amount payable on demand, discounted from the first date that the amount could be required to be paid. Refer to Notes 13, 14, 15, 16 and 17 for the estimated fair values of due to other banks, customer accounts, promissory notes issued, subordinated deposits and other borrowed funds, respectively.

Derivative financial instruments. All derivative financial instruments are carried at fair value as assets when the fair value is positive and as liabilities when the fair value is negative. Refer to Notes 3 and 28.

Earnings per Share

Basic earnings per share are calculated by dividing the net profit attributable to equity holders of the Bank by the weighted average number of ordinary shares in issue during the year, excluding treasury shares.

The Bank has no dilutive potential ordinary shares; therefore, the diluted earnings per share equal the basic earnings per share.

In thousands of Russian Roubles	Note	2006	2005
Profit attributable to ordinary shareholders		853 045	90 084
Profit for the year (all allocated to ordinary shareholders)		853 045	90 084
Weighted average number of ordinary shares in issue	19	13 453	6 494
Basic and diluted earnings per ordinary share		63	14

Related Party Transactions

For the purposes of these consolidated financial statements, parties are considered to be related if one party has the ability to control the other party, is under common control, or can exercise significant influence over the other party in making financial or operational decisions. The Bank's only shareholder is the Government of the

Russian Federation represented by the Federal Agency for Managing State Property (See Note 1).

Starting from 2006, the Group included in key management personnel only members of the Management Board, management of subsidiary bank and their family members. The comparative information for 2005 has been adjusted accordingly.

At 31 December 2006, the outstanding balances with related parties were as follows:

In thousands of Russian Roubles	2006	2005
Cash and cash equivalents		
Cash balances with the CBRF (other than mandatory reserve deposits)	11 663 404	2 689 306

Principal Consolidated Subsidiary and Special Purpose Entity

At 31 December 2006, the Bank's principal consolidated subsidiary was as follows:

Name	Nature of business	Percentage of voting rights, %	Percentage of ownership	Country of registration
Subsidiary				
Closed Joint – Stock Company «Chelyabinsky Commercial Land Bank»	Bank	99.47%	99.47%	Russia
Special Purpose Entity				
RSHB Capital S.A.	Eurobonds issue	—	—	Luxembourg

RSHB Capital S.A. is a company incorporated in Luxembourg in 2005, is owned by the foundations established under the laws of the Netherlands and has been established as a special purpose vehicle for the sole purpose of issuing Eurobonds and lending the issue proceeds to the Bank (refer to Notes 16 and 17).

Subsequent Events

In February 2007, the Group issued domestic bonds denominated in Russian Roubles in the amount of RR 10 000 000 thousand maturing in February 2017 with semi-annual payments of coupon income at 7.34% p.a. and yield to the next repricing date in February 2010 of 7.48% p.a. at the date of issue.

In March 2007, the Group issued Eurobonds denominated in Swiss Francs in the total amount of CHF 375 million.

These borrowings mature on 29 March 2010 and have a coupon rate of 3.583% p.a. payable annually and yield to maturity of 3.583% p.a. at the date of issue.

In April 2007 the Group attracted 2 tranches of syndicated loan in US Dollars with the total amount of USD 520 mln, with maturities in October 2008 and April 2010, semi-annual coupon at the rate of LIBOR + 0.3% p.a. (for tranche A) and LIBOR + 0.4% p.a. (for tranche B).
